attitudes toward pristine and altered landscapes which they encountered settled in modified and moved westward from during the last three centuries *A Genealogy of the Good and Critique of Hubris* Phillip Dybicz, 2023 In the first postmodern genealogical history of social work this book identifies common practices of a particular era to inform the description of a cultural and philosophical framework that allows the reader to step inside the shoes of people from that era and understand the practices through their eyes These insights are then utilized to promote moral reflection of current practices of social welfare and hopefully avoid moral lapses that may arise from our present biases of understanding

In the Midst of Things Mike Owen Benediktsson, 2025-06-17 How ordinary urban objects influence our behavior exacerbate inequality and encourage social change Assumptions about human behavior lie hidden in plain sight all around us programmed into the design and regulation of the material objects we encounter on a daily basis In the Midst of Things takes an in depth look at the social lives of five objects commonly found in the public spaces of New York City and its suburbs revealing how our interactions with such material things are our primary point of contact with the social political and economic forces that shape city life Drawing on groundbreaking fieldwork and a wealth of original interviews Mike Owen Benediktsson shows how we are in the midst of things whose profound social role often goes overlooked A newly built lawn on the Brooklyn waterfront reflects an increasingly common trade off between the marketplace and the public good A cement wall on a New Jersey highway speaks to the demise of the postwar American dream A metal folding chair on a patch of asphalt in Queens exposes the political obstacles to making the city livable A subway door expresses the simmering conflict between the city and the desires of riders while a newsstand bears witness to our increasingly impoverished streetscapes In the Midst of Things demonstrates how the material realm is one of immediacy control inequality and unpredictability and how these factors frustrate the ability of designers planners and regulators to shape human behavior

Urban Masses and Moral Order in America, 1820-1920 Paul S. BOYER, Paul S Boyer, 2009-06-30 For over a century dark visions of moral collapse and social disintegration in American cities spurred an anxious middle class to search for ways to restore order In this important book Paul Boyer explores the links between the urban reforms of the Progressive era and the long efforts of prior generations to tame the cities He integrates the ideologies of urban crusades with an examination of the careers and the mentalities of a group of vigorous activists including Lyman Beecher the pioneers of the tract societies and Sunday schools Charles Loring Brace of the Children s Aid Society Josephine Shaw Lowell of the Charity Organization movement the father of American playgrounds Joseph Lee and the eloquent city planner Daniel Hudson Burnham Boyer describes the early attempts of Jacksonian evangelicals to recreate in the city the social equivalent of the morally homogeneous village he also discusses later strategies that tried to exert a moral influence on urban immigrant families by voluntarist effort including for instance the Charity Organizations friendly visitors By the 1890s there had developed two sharply divergent trends in thinking about urban planning and social control the bleak assessment that led to coercive strategies and the hopeful

evaluation that emphasized the importance of environmental betterment as a means of urban moral control *Housing and Planning References*, 1971 **Encyclopedia of American Urban History** David Goldfield, 2007 Publisher description [A Clearing In The Distance](#) Witold Rybczynski, 2013-07-23 In a brilliant collaboration between writer and subject Witold Rybczynski the bestselling author of *Home and City Life* illuminates Frederick Law Olmsted's role as a major cultural figure at the epicenter of nineteenth century American history We know Olmsted through the physical legacy of his stunning landscapes among them New York's Central Park California's Stanford University campus and Boston's Back Bay Fens But Olmsted's contemporaries knew a man of even more extraordinarily diverse talents Born in 1822 he traveled to China on a merchant ship at the age of twenty one He cofounded *The Nation* magazine and was an early voice against slavery He managed California's largest gold mine and during the Civil War served as the executive secretary to the United States Sanitary Commission the precursor of the Red Cross Rybczynski's passion for his subject and his understanding of Olmsted's immense complexity and accomplishments make his book a triumphant work In *A Clearing in the Distance* the story of a great nineteenth century American becomes an intellectual adventure **Do Museums Still Need Objects?** Steven Conn, 2010 We live in a museum age writes Steven Conn in *Do Museums Still Need Objects* And indeed at the turn of the twenty first century more people are visiting museums than ever before There are now over 17 500 accredited museums in the United States averaging approximately 865 million visits a year more than two million visits a day New museums have proliferated across the cultural landscape even as older ones have undergone transformational additions from the Museum of Modern Art and the Morgan in New York to the High in Atlanta and the Getty in Los Angeles If the golden age of museum building came a century ago when the Metropolitan Museum of Art the American Museum of Natural History the Philadelphia Museum of Art the Field Museum of Natural History and others were created then it is fair to say that in the last generation we have witnessed a second golden age By closely observing the cultural intellectual and political roles that museums play in contemporary society while also delving deeply into their institutional histories historian Steven Conn demonstrates that museums are no longer seen simply as houses for collections of objects Conn ranges across a wide variety of museum types from art and anthropology to science and commercial museums asking questions about the relationship between museums and knowledge about the connection between culture and politics about the role of museums in representing non Western societies and about public institutions and the changing nature of their constituencies Elegantly written and deeply researched *Do Museums Still Need Objects* is essential reading for historians museum professionals and those who love to visit museums **National Trust Guide / San Francisco** Peter Booth Wiley, 2000-09-26 National Trust guides are the most in depth guides available to the history and architecture of U S cities From famous landmarks to back alleys they take you on exciting journeys through America's cultural historical and architectural treasures The complete guide to the history and architecture of San Francisco Part history part travel guide this unique book introduces you to the

Louise A. Mozingo,2016-05-27 How business appropriated the pastoral landscape as seen in the corporate campus the corporate estate and the office park By the end of the twentieth century America s suburbs contained more office space than its central cities Many of these corporate workplaces were surrounded somewhat incongruously by verdant vistas of broad lawns and leafy trees In Pastoral Capitalism Louise Mozingo describes the evolution of these central but often ignored features of postwar urbanism in the context of the modern capitalist enterprise These new suburban corporate landscapes emerged from a historical moment when corporations reconceived their management structures the city decentralized and dispersed into low density auto dependent peripheries and the pastoral in the form of leafy residential suburbs triumphed as an American ideal Greenness writes Mozingo was associated with goodness and pastoral capitalism appropriated the suburb s aesthetics and moral code Like the lawn proud suburban

homeowner corporations understood a pastoral landscape's capacity to communicate identity status and right mindedness Mozingo distinguishes among three forms of corporate landscapes the corporate campus the corporate estate and the office park and examines suburban corporate landscapes built and inhabited by such companies as Bell Labs General Motors Deere Company and Microsoft She also considers the globalization of pastoral capitalism in Europe and the developing world including Singapore India and China Mozingo argues that even as it is proliferating pastoral capitalism needs redesign as do many of our metropolitan forms for pressing social cultural political and environmental reasons Future transformations are impossible however unless we understand the past Pastoral Capitalism offers an indispensable chapter in urban history examining not only the design of corporate landscapes but also the economic social and cultural models that determined their form
