Philosophical Dimensions of the Neuro-Medical Sciences S.F. Spicker, H. Tristram Engelhardt Jr., 2012-12-06 Although the investigation and regulation of the faculties of the human mind appear to be the proper and sole concern of philosophers you see that they are in some part nevertheless so little foreign to the medical forum that while someone may deny that they are proper to the physician he cannot deny that physicians have the obligation to philosophize Jerome Gaub De regimine mentis IV 10 10 p 40 The Second Trans Disciplinary Symposium on Philosophy and Medicine whose principal theme was Philosophical Dimensions of the Neuro Medical Sciences convened at the University of Connecticut Health Center at the invitation of Robert U Massey Dean of the School of Medicine during May 15 16 and 17 1975 The Proceedings constitute this volume At this Symposium we intended to realize sentiments which Sir John Eccles expressed as director of a Study Week of

The Neurologically-Impaired Child Robert A. Cummins, 2018-10-03 For the 25 years before publication a form of therapy known as the Doman Delacato Techniques had been applied to children with disabilities The therapy originated from the work of Glen Doman and Carl Delacato who established the Institutes for

the Achievement of Human Potential in Philadelphia The institutes claim to be able to treat a wide range of disabilities and their best known technique is called Patterning and is prescribed for children who have no capacity for voluntary movement Yet many professional bodies and associations have denounced the approach as overly expensive ineffective creating false hopes being destructive to family life and based on false theoretical assumptions Originally published in 1988 this book was the first to offer a detailed analysis and critique of the Doman Delacato approach The author draws on data from evolution neuroanatomy and neurophysiology to challenge its theoretical assumptions He shows that there is no sound scientific basis to the techniques Any improvements in a child s condition can be attributed to the increased energy and attention given to that child rather than the content of the programme At the same time parents become emotionally ransomed and deluded by false expectations Written in a style that will be accessible to non specialists the book is an important work for both parents and professionals concerned with the welfare of neurologically impaired children
