Basic Science In Gastroenterology Structure Of The Gut:

Structure of Enteric Neurons Axel Brehmer, 2006-10-06 This book first presents an overview on the chemical coding of the morphological neuron types described by Stach in the pig intestine In doing so we have pointed out the difference between the definitions of type I neurons given by Dogiel and Stach Secondly it provides a basis for the morpho chemical classification of human enteric neurons as revealed by their immunoreactivity for neurofilaments and several neuroactive substances or related markers **Physiological and Pharmacological Aspects of the Reticulo-Rumen** L.A.A.

Ooms, A.D. Degryse, A.S.J.P.A.M. van Miert, 2012-12-06 The success of a scientific workshop depends on a delicate blend of many types of ingredients Most important is to select a provocative topic which is at the forefront of a current investigative study Coupled together with a relatively small but distinguished group of active research scientists known for their continued record of contributing significant findings one has the firm foundation for an exciting and rewarding investment of time and effort This was the setting for the first workshop organized by the European Association for Veterinary Pharmacology and Toxicology Ruminants have been domesticated for many centuries and have served mankind as a source of dairy products meat wool and power The ruminant stomach has long been and still is a major concern for physiologists pathologists clinicians and pharmacologists This workshop was organized and convened in an attempt to strengthen the basic science of the ruminant stomach as it applies to an economically important group of mammals To achieve this various topics were covered by specialists which ensured presentation of new data followed by discussions In this book reviews are presented on the different topics motility control and regulation neurotransmitters and endogenous substances involved flow of digesta comparative aspects role of content and metabolites food intake rumen metabolism chemical manipulation metabolism of xenobiotics and drugs pharmacology of forestomach motility and the reticulo rumen as a pharmacokinetic compartment
