been widely rejected in Japan with less than two percent of the population identifying as Christian The dominant worldview
in Japan is deeply animistic with beliefs such as the Japanese mana concept ki the Japanese soul concept and the concept of
God god s kami being deeply rooted in the culture and fundamentally influencing society Dr Martin Hei wolf with his years of
experience in Japan critically examines Japanese animism in light of core Christian beliefs such as the concepts of peace and
salvation Central to Japanese people s rejection of Christian truth is the diametric opposition of its supernatural message to
the natural focus of Japanese animistic folk religion Hei wolf s meticulous study is framed squarely within missiological
thought and praxis so Christians serving in Japanese contexts are better able to communicate the message of the gospel by
more fully understanding Japanese people people by whom God wants to be known Japan Tax Guide Volume 1 Strategic

Entrich, 2017-12-07 This book examines why Japan has one of the highest enrolment rates in cram schools and private tutoring worldwide It sheds light on the causes of this high dependence on shadow education and its implications for social inequalities The book provides a deep and extensive understanding of the role of this kind of education in Japan It shows new ways to theoretically and empirically address this issue and offers a comprehensive perspective on the impact of shadow education on social inequality formation that is based on reliable and convincing empirical analyses Contrary to earlier studies the book shows that shadow education does not inevitably result in increasing or persisting inequalities but also inherits the potential to let students overcome their status specific disadvantages and contributes to more opportunities in education Against the background of the continuous expansion and the convergence of shadow education systems across the globe the findings of this book call for similar works in other national contexts particularly Western societies without traditional large scale shadow education markets The book emphasizes the importance and urgency to deal with the modern excesses of educational expansion and education as an institution in which the shadow education industry has made itself seemingly indispensable
