Our lives are flooded with information, and the challenge for all of us is to make sense of it. Unless you can find patterns in the data, it's just a jumble of facts. One of the first ways you can find meaning is to organize the data into graphs, to give a general picture of what's going on. Then you can summarize the data by finding measures of center and spread, and look for ways to express the relationships you see.

Types of graphs

Line graphs are used to show the change in some quantity over time. The line graph in Figure 17-1 shows the change in the number of hot dogs sold at Jenny's Beach Bungalow over the course of a year. Each dot represents the sales for a particular month, but the lines connecting the points help to show the trend.
