Stewart, 1999

Early fixed wing research demonstrated that potential cost and training benefits could be derived from simulation augmented primary flight training Unfortunately more recent research in this area has been the exception not the rule This is especially true in the case of rotary wing helicopter aircrew training research The present report reviewed the research literature on military aviation transfer of training TOT research and examined the current U S Army Initial Entry Rotary Wing IERW Program of Instruction An in depth review was also conducted on the recent IERW simulation research performed by the Army Research Institute ARI Rotary Wing Aviation Research Unit RWARU Review of the IERW TOT research showed that a combination of synthetic flight simulation and criterion based training had the potential for saving training time and costs in the aircraft Adaptive training aids such as the ARI RWARU Intelligent Flight Trainer also showed promise A research program focusing on revising the current IERW program to optimize the use of simulation was proposed This program would include a criterion based instructional strategies b low cost simulation and c investigation of different combinations of simulator vs aircraft training events in order to determine the optimal simulator aircraft training mix DTIC **Flight and Ground Instructor Knowledge Test Guide**, 1994 *Air Training Command Reorganization* United States. Congress. House. Appropriations, 1960 **Pilot School Certification** United States. Federal Aviation Administration, 1974 The analysis of practical skills W.T. Singleton, 2013-06-29

The origins of this book are in my first attempts to understand psychology as a post war student in the Cambridge of the late 1940s Sir Frederic Bartlett and his colleagues in the Psychology Department were talking and writing about the concept of the skill as the fundamental unit of behaviour This made entire sense to me but not apparently to very many other people because the movement dwindled rapidly with the retirement of Sir Frederic in 1952 It got lost within performance studies which were essentially behaviouristic and stimulus response in origin a quite different style of thinking from the gestalt approach of skill psychology This is not a simple dichotomy of course and skill psychology does go some way towards the analytic approach in accepting that a science needs to have a basic element a unit from which the complexities of real behaviour can be constructed into which it can be analysed and in terms of which it can be described and understood The trick is to pick the right unit and I think that skills is an appropriate unit for human behaviour Note the plural although these units are elements they are not identical any more than the ninety odd elements of the physical world are identical The issue is sometimes clarified by considering the analogy with the attempt to describe a house The simplest observable elements here are the brick the piece

of stone or the piece of wood **Hearings** United States. Congress. House,1960 Subject Index to Unclassified ASTIA Documents Defense Documentation Center (U.S.),1960 **Training to Fly** Rebecca Hancock Cameron,1999 Military Flight training 1907 1945 **Air Corps Newsletter** Air Corps.
