Basics Of Religious Education:

Basics of Religious Education Martin Rothgangel, Gottfried Adam, Rainer Lachmann, Thomas Schlag, Friedrich Schweitzer, 2014 This volume offers an introduction to all questions of teaching Religious Education as a school subject and as an academic discipline related to this subject The chapters cover most of the aspects that religion teachers have to face in their work as well as the theoretical background necessary for this task The volume is a textbook for students and teachers of religious education be it in school or in an academic context who are looking for reliable information on this field The book has proven its usefulness in German speaking countries This volume is the English translation of the German Compendium of Religious Education edited by Gottfried Adam and Rainer Lachmann The present English version is based on the 2012 edition which aims for a most current representation of the field The background of the book is Protestant but its outlook is clearly ecumenical and questions of interreligious education are considered in many of the chapters The compendium continues to be widely used in Germany Austria and Switzerland as an introduction to the field and as a handbook for students who are preparing for their final exams The English edition makes this compendium available to students and colleagues in other countries [Some Basics of Religious Education in Zambia](#) ,2007 **Basics of Religious Education** Sheikh Abdul Hadi, 1997 [Christian-Muslim Dialogue in Northern Nigeria](#) Thaddeus Byimui Umaru, 2013-08-14 Religion as a powerful impulse in human existence plays a paradoxical role in society as it both contributes significantly in shaping the spiritual socio political and economic lives of millions of people and also acts as a source of conflict The sad experience of interreligious conflict in Northern Nigeria challenges the claim of Islam and Christianity to be religions of peace However understood as closely intertwined with culture and custom of a people religion can be central in the establishment of peace and conflict resolution in and between communities This text using the model of dialogue Nostra Aetate explores and presents the socio political and theological resources available in Northern Nigeria the locality for a consistent peace building process **Religious Education in a Global-Local World** Jenny Berglund, Yafa Shanneik, Brian Bocking, 2016-07-15 This book examines Religious Education RE in over ten countries including Australia Indonesia Mali Russia UK Ireland USA and Canada Investigating RE from a global and multi interdisciplinary perspective it presents research on the diverse past present and possible future forms of RE In doing so it enhances public and professional understanding of the complex issues and debates surrounding RE in the wider world The volume emphasizes a student centred approach viewing any kind of RE or its absence as a formative lived experience for pupils It stresses a bottom up sociological and ethnographic anthropological research based approach to the study of RE rather than the top down approaches which often start from prescriptive legal ideological or religious standpoints The twelve chapters in this volume regard RE as an entity that has multiple and contested meanings and interpretations that are constantly negotiated For some RE means religious nurturing either tailored to parental views or meant to inculcate a uniform religiosity For others RE

means learning about the many religious and non religious world views and secular ethics that exist not promoting one religion or another Some seek to avoid the ambiguous term religious education replacing it with terms such as education about religions and beliefs or the religious dimension of intercultural education The Routledge International Handbook of Religious Education Derek Davis,Elena Miroshnikova,2013-02-01 How and what to teach about religion is controversial in every country The Routledge International Handbook of Religious Education is the first book to comprehensively address the range of ways that major countries around the world teach religion in public and private educational institutions It discusses how three models in particular seem to dominate the landscape Countries with strong cultural traditions focused on a majority religion tend to adopt an identification model where instruction is provided only in the tenets of the majority religion often to the detriment of other religions and their adherents Countries with traditions that differentiate church and state tend to adopt a separation model thus either offering instruction in a wide range of religions or in some cases teaching very little about religion intentionally leaving it to religious institutions and the home setting to provide religious instruction Still other countries attempt managed pluralism in which neither one nor many but rather a limited handful of major religious traditions are taught Inevitably there are countries which do not fit any of these dominant models and the range of methods touched upon in this book will surprise even the most enlightened reader Religious instruction by educational institutions in 53 countries and regions of the world are explored by experts native to each country These chapters discuss Legal parameters in terms of subjective versus objective instruction in religion Constitutional statutory social and political contexts to religious approaches Distinctions between the kinds of instruction permitted in elementary and secondary schools versus what is allowed in institutions of higher learning Regional assessments which provide a welcome overview and comparison This comprehensive and authoritative volume will appeal to educators scholars religious leaders politicians and others interested in how religion and education interface around the world *Fundamentals of Religious Education* Catholic Church.
