**BASIC Game Plans** BAUMANN,2013-06-29 The computer is a toy tossed to us by Nature for diversion and comfort in the darkness d Alembert I hate everything which merely instructs without stimulating me or increasing my own activity Goethe Let's try to eliminate some misconceptions from the outset this book is not a collection of game recipes assembled in the form of finished programs which only have to be typed into the computer and then played Far from it The object is to challenge readers to activate their own creativity in using computer games The game concept is designed to develop into

game strategy and this then should form the basis of computer programming Programming computers is in itself the game Or to put it another way readers can learn programming while playing No previous knowledge of programming is assumed of readers and users of this book only the willingness to accept new ideas and improve upon them independently While all the programs in this book have been run and tested some are intentionally imperfect They await the finishing touches from you the reader The additional brainteasers at the end of the chapters or occasionally after a section within a chapter are therefore designed to inspire your imagination and encourage your independence The material is drawn from numerous sources
