Students will gain critical insights into the role psychological factors play in health and exercise and the psychological consequences of participation in sport and physical activity, including children's psychological development through sport participation, aggression in sport, and moral development and good sporting behavior in sport and physical activity contexts. More than 100 related online activities offer interactive opportunities to engage with the content, many of which can be assigned and progress tracked by instructors directly through HKPropel. In addition, chapter quizzes may also be assigned; these are automatically graded to test comprehension of critical concepts. Some activities may be downloaded and printed as assignments to be completed by students. Many of the activities offer compelling audio and video clips that reveal how sport psychology consultants communicate with athletes and coaches to improve athletic experiences. These clips feature esteemed experts from the field discussing concepts that they have studied and refined during their professional careers.
