Albania Filling The Vulnerability Gap:

Albania Gloria La Cava,2000 Albania Gloria La Cava,Raffaella Nanetti,2000-01-01 During Albania s transition from a centralized economy to one anchored in a body of Western laws deep social unrest widespread poverty uncontrolled migration and the reemergence of clan based loyalties have led to an increase in the most vulnerable population groups These groups are more likely to be marginalized by the economic cycle thus making it more difficult to ensure a successful transition One purpose of the study is to identify key emerging social issues and problems in Albania and determine their causes However the main purpose of this report is to propose a short to medium term action strategy to guide and connect social policy and assistance initiatives targeted to the vulnerable groups in areas where they are most numerous through a bottom up approach District Energy Trends, Issues, and Opportunities Carolyn Gochenour,2001-01-01 This report evaluates the history and development of district heating and district cooling together referred to as district energy in North America Western Europe Asia Eastern and Central Europe and the former Soviet Union It reviews the key institutional economic financial technical and environmental issues in the countries of Eastern and Central Europe and the former Soviet Union in order to arrive at operationally relevant issues as well as to define opportunities for new activities to be supported by the World Bank Rural Development Strategy Csaba Csáki,Laura Tuck,2000-01-01 With the larger role that the agricultural sector plays in the Eastern Europe and Central Asian ECA region emphasis must be placed on the sector s sustained growth and prosperity The Bank strategy for rural development in the ECA region during the early phase of transition emphasized the reform of agricultural policies and assistance in privatizing restructuring and rebuilding agriculture and agro industrial complexes In retrospect it can be seen that the ECA countries concerned made the right choice when they set their objective to transform their socialized agriculture into a private ownership and market based system Given the developments of the past decade it is clear however that the initial expectations for the outcomes of such reforms were overly optimistic The transition process in agriculture is far more complex than originally envisaged by both the countries themselves and the international community including the Bank Increased social problems and alarming growth of poverty have added a new unexpected dimension to the transition process As the analysis indicates the region s rural economy is still struggling to adjust to new economic realities and this will require further refinement and adjustment of the Bank s approach as well This volume based on an overview of recent regional developments summarizes the revised World Bank assistance strategy for rural development in the ECA region *Utility Pricing and the Poor* Julian A. Lampietti,2001-01-01 *Utility Pricing and the Poor* evaluates the 1999 electricity tariff increase and the potential for improved water sector cost recovery with a particular focus on service accessibility and affordability for the poor A two stage approach is recommended In the first stage revenues should be increased by ensuring payment from households that have reliable service but are not paying their bills After collection capacity is strengthened the utility should implement a program of tariff

adjustment based on improved service and meter based billing From Transition to EU Accession Pietro Garibaldi, Mattia Makovec, Gabriella Stoyanova, 2001-01-01 This book studies the Bulgarian labor market with a view to understanding the interactions between the performance of the Bulgarian economy and the functioning of its labor market It evaluates the position of Bulgaria vis a vis compliance with the *acquis communautaire* and provides a set of key policy recommendations that may enhance the job creation potential in years to come

Attacking Extreme Poverty Quentin Wodon, 2001-01-01 this book gives us a history lesson and a guide on how to build commercial finance that fits the needs of the world's poorest majority Policy makers finance leaders and anyone who wants to join this revolution in banking must read this book Around the world a revolution is occurring in finance for low income people The microfinance revolution is delivering financial services to the economically active poor on a large scale through competing financially self sufficient institutions In a few countries this has already happened in others it is under way The emerging microfinance industry has profound implications for social and economic development For the first time in history capital is well on its way to being democratized The Microfinance Revolution in three volumes is aimed at a diverse readership: economists bankers policymakers donors and social scientists microfinance practitioners and specialists in local finance and rural and urban development and members of the general public interested in development This first volume Sustainable Finance for the Poor focuses on the shift from government and donor subsidized credit systems to self sufficient microfinance institutions providing voluntary savings and credit services

Natural Resource Management Strategy ,2000-01-01 Arable land deserts mountains forests rivers and coastal zones characterize the diverse regions in Eastern Europe and Central Asia ECA As varied as the geography is so are the policy directions taken by the region's governments concerning natural resource management A lack of conservation measures misuse and poor management have impaired many of the natural resources now available in these countries Although the

pressure on natural resources in ECA is less than in other regions and the area has more abundant resources the accessibility and utility of those resources belie the figures Where there is arable land the growing season is short Where there are immense forests the climate is harsh To assist the Bank's client countries in ECA with sustainable use of natural resources this volume identifies the various challenges provides a history of the Bank's regional natural resource strategy outlines a strategic framework and proposes new strategies and policy instruments to implement them Natural resources in this publication refer to non mineral resources such as forests rivers and land
