Arms Control Verification:

A Conceptual Working Paper on Arms Control Verification F. R. Cleminson, E. Gilman, Canada. Arms Control and Disarmament Division, 1986 **Verification** United States. Arms Control and Disarmament Agency, 1976 **The Verification Challenge** by Richard A. Scribner, Theodore J. Ralston, William D. Metz, 1985 The Verification Challenge SCRIBNER, RALSTON, METZ, 2013-12-11 **Challenges Of Verification** Heinz Gaertner, 2019-05-20 Heinz Gaertner argues in this Occasional Paper one area of arms control in which the NNA and smaller European states can make a significant contribution is verification This study explores the possibilities for the smaller nations of Europe to make positive contributions to the verification of reductions in conventional forces and arms a chemical **The Verification Challenge** Richard A. Scribner, Theodore J. Ralston, William D. Metz, 1985 *Verification* Allan S. Krass, Stockholm International Peace Research Institute, 2020-11-19 Originally published in 1985 the level of anxiety and suspicion between the USA and the USSR had rarely been higher Many advocates of arms control believed that effective verification would reduce tensions and lessen the risk of war This book analyses the two main issues of verification One is technological what are the present capabilities of various verification techniques and what is their potential The devices and methods currently employed by the two major nuclear powers and by international organizations to monitor the compliance of states with arms control or disarmament treaties are examined The second issue is political how do US and Soviet approaches compare what are the roles of domestic and bureaucratic politics and on what criteria can a workable standard of adequacy be based In short how much is enough Although the study concludes that a number of significant arms control measures can already be adequately verified modern weapons are becoming more mobile and it is becoming easier to conceal them There is a danger that the ability to hide weapons will outstrip the ability to find them Verification cannot promise to detect all violations a workable standard of adequacy in verification must derive from the ability to detect militarily significant violations **Verification in an Age of Insecurity** Philip O'Neill, 2009-12-17 Verification in an Age of Insecurity takes the reader into some of the most urgent arms control issues facing the world community including the nuclear activities of rogue states and threats from sophisticated non state actors In the book national security expert Philip D O'Neill Jr identifies and addresses issues from the resuscitated disarmament agenda from the comprehensive test ban to fissile material and biological weapons O'Neill examines the need for shifts in verification standards and policy suitable for our volatile era and beyond it He surveys recent history to show how established verification procedures fail to produce the certainty necessary to meet today's threats Verification in an Age of Insecurity goes beyond a discussion of rogue states like North Korea to offer suggestions on how best to bring compliance policy up to date with modern threats *Nuclear Non-proliferation and Arms Control Verification* Irmgard Niemeyer, Mona Dreicer, Gotthard Stein, 2020-03-12 This book strives to take stock of current achievements and existing challenges in nuclear verification identify the available information and gaps that can act as drivers for exploring new approaches to verification

strategies and technologies With the practical application of the systems concept to nuclear disarmament scenarios and other non nuclear verification fields it investigates where greater transparency and confidence could be achieved in pursuit of new national or international nonproliferation and arms reduction efforts A final discussion looks at how in the absence of formal government to government negotiations experts can take practical steps to advance the technical development of these concepts

On-site Inspection for Arms Control Richard L. Shearer,1984

The Converging Roles of Arms Control Verification, Confidence-building Measures and Peace Operations Patricia Bliss McFate,Canada. Non-Proliferation, Arms Control and Disarmament Division,1994 This report explores the interrelationships among three processes arms control verification confidence building and peacekeeping It argues that in the current dangerous and unstable world these three processes are undergoing changed demands which brings each into closer relationship with the others underlying this report is the premise that the synergistic relationships among these three processes can further contribute to international security through both improved effectiveness and better use of limited resources The study also emphasizes that the roles of the United Nations and other international bodies could be expanded and harmonized to contribute to greater transparency and security

Arms Control Verification and the New Role of On-site Inspection Lewis A. Dunn,Amy E. Gordon,1990 Since enactment of the INF Treaty on site inspection to monitor compliance has come to figure prominently in negotiations over strategic arms reductions conventional force reductions and specific weapons bans This volume offers many perspectives on the future of on site inspection in arms control Experts in the field offer their evaluations of what on site inspection can and cannot contribute to the realization of US arms control and national security goals in the coming decade Annotation copyrighted by Book News Inc Portland OR

Listening For The Bomb Philip G. Schrag,2019-08-16 Graham Allison s book *Essence of Decision* changed the way in which academic analysts think about how governments make major foreign and defense policy decisions 1 Before Allison s book appeared in 1971 even the leading writers on foreign policy tended to describe and explain governmental decisions almost exclusively as if governments were rational human beings making carefully considered choices among available options This book applies the Allisonian framework to the response of the United States government to a private arms control initiative undertaken in 1986 by the Natural Resources Defense Council an environmental organization
