Reports and Documents Concerning the Activities of the Indian Arts and Crafts Board United States. Indian Arts

and Crafts Board,1943 Technology, renewable resources, and American crafts. , **Markets, Firms and the Management of Labour in Modern Britain** Howard F. Gospel,1992-05-14 Originally published in 1992 this book examines the development of employers human resource management and industrial relations policies in Britain It adopts a broad historical perspective beginning with the inheritance from the nineteenth century and ending with an analysis of human resource management policies It focuses on how managers organise the employment relationship how they control work relations and how they deal with trade unions and industrial relations The author examines these in the context of the market within which the firm operates and the strategy structure and hierarchy of industrial enterprise The book shows that historically British employers tended to adopt market based strategies rather than internal ones **Understanding Early Civilizations** Bruce G. Trigger,2003-05-05 This book offers the first detailed comparative study of the seven best documented early civilizations ancient Egypt and Mesopotamia Shang China the Aztecs and adjacent peoples in the Valley of Mexico the Classic Maya the Inka and the Yoruba Unlike previous studies equal attention is paid to similarities and differences in their sociopolitical organization economic systems religion and culture Many of this study s findings are surprising and provocative Agricultural systems technologies and economic behaviour turn out to have been far more diverse than was expected These findings and many others challenge not only current understandings of early civilizations but also the theoretical foundations of modern archaeology and anthropology The key to understanding early civilizations lies not in their historical connections but in what they can tell us about similarities and differences in human behaviour Industries, Firms, and Jobs George Farkas,Paula England, What are the links among industrial structure segmentation the internal structure of firms job characteristics technology productivity labor markets and product markets The answers posited by a distinguished group of sociologists and economists have gained resonance as the field of economic sociology has grown In this expanded edition the editors and their economist colleague Kevin Lang explore the theoretical interstices and update the references Sociologists and economists have responded differently to work within the other discipline For some sociologists the typical economic assumption of basic actors engaged in rational action is both unrealistic and objectionable Other sociologists have not always agreed with everything economists do they have seen rational choice as a partially true description of human behavior and as a starting point for sociological theorizing Among economists the situation is quite different most have maintained their basic rational choice model while pushing aggressively into substantive areas previously addressed only by sociologists and political scientists **Industries Firms and Jobs** is a welcome reassertion of an old tradition of interdisciplinary research That tradition has recently weakened largely because of an enormous expansion of the domain of neoclassical economics The expansion has fed on two scientific developments human capital theory and contract theory This book is an invaluable resource for all economists sociologists labor specialists and business professionals **Schooling and Work in the Democratic State** Martin Carnoy, Henry Levin,1985-06-01 A new explanation of the relation between schooling

and work in the democratic advanced industrial state emerges from this study that rejects both traditional views and the more recent Marxian perspective Traditional views consider schools as autonomous institutions that are able to pursue the goals of equality and social mobility irrespective of the inequalities of capitalist society the Marxian perspective views schools as serving the role of producing wage labor for capitalistic exploitation The authors suggest that the shortcomings of both views are rooted in the fact that they do not recognize the true functions of the democratic capitalist state The state is seen as an arena for struggle between forces pushing for egalitarian democratic reforms and those seeking to use the resources of the state for private capital accumulation Depending on which side has primacy at the moment schools will reflect one set of goals over the other However victory is never complete and the tide of battle has shifted back and forth historically The authors develop this theory through interpreting the dynamic relation between U S schools and the workplace Based on this approach they predict changes in both schooling and work as well as the forms that future conflicts between the contending forces are likely to take
