What Counts in Teaching Mathematics Sandy Schuck, Peter Pereira, 2011-02-04 In this book internationally recognised scholars and practitioners synthesise current practice and research developments in the area of mathematics teacher education and mathematics education The book's two sections examine the role and significance of collaborations and critical friends in the self study of mathematics teaching and teacher education and the emerging conflicts dilemmas and incongruities arising from the study of mathematics education practices The book considers the insights gained from self analysis regarding the practitioner themselves as well as their pedagogical content students and approaches The contributions highlight the complexity characteristics and features of mathematics education The chapters reveal nuances in teaching and learning that are of particular relevance in mathematics education In addition the book contains ideas and suggestions on how to enhance the teaching of mathematical content to pre service teachers Accordingly the book appeals to a wide audience of educators including education academics teachers student teachers and researchers As teacher educators involved in mathematics education reflection on practice and engagement in practitioner research is becoming increasingly important in our efforts to enhance our teaching Teachers and student teachers also gain from the insights arising from such reflection The knowledge and experience encapsulated in this book provides much for the mathematics education community to build on

Early Childhood Education Petr G. Grotewell, Yanus R. Burton, 2008 This book focuses on early childhood education which spans the human life from birth to age 8 Infants and toddlers experience life more holistically than any other age group Social emotional cognitive language and physical lessons are not learned separately by very young children Adults who are most helpful to young children interact in ways that understand that the child is learning from the whole experience not just that part of the experience to which the adult gives attention Although early childhood education does not have to

occur in the absence of the parent or primary caregiver this term is sometimes used to denote education by someone other than these the parent or primary caregiver Both research in the field and early childhood educators view the parents as an integral part of the early childhood education process Early childhood education takes many forms depending on the theoretical and educational beliefs of the educator or parent Other terms that is often used interchangeably with early childhood education are early childhood learning early care and early education Much of the first two years of life are spent in the creation of a child s first sense of self or the building of a first identity Because this is a crucial part of children s makeup how they first see themselves how they think they should function how they expect others to function in relation to them early care must ensure that in addition to carefully selected and trained caregivers links with family home culture and home language are a central part of program policy If care becomes a substitute for rather than a support of family children may develop a less than positive sense of who they are and where they come from because of their child care experience
