Creating Learning Centered Clabrooms Vol 26 What Does Learning Theory Have To Say:

Theorizing Teaching and Learning in Asia and Europe John Chi-Kin Lee, Kerry J. Kennedy, 2017-03-27 There has been much debate in recent times between the Anglo American tradition of curriculum studies and the Continental and North European tradition of didactics Didaktik As important as such debate has been this book seeks to add new voices to the debate representing ideas and traditions from a different part of the world The focus is on Chinese curriculum thinking that has passed through a number of stages and currently represents a blend of some aspects of the American tradition and Chinese cultural traditions How does Chinese thinking about curriculum teaching and learning resonate with European didactic traditions and what are the implications for theorizing an expanded field of curriculum studies This book deliberately transcends borders and cultures to explore new territory to provide a platform for open dialogue and to open up new areas of investigation Chapters include Curriculum Reform and Research in China A Social Historical Perspective What Mathematics Did Teachers Learn Comparison of the School and the Pre Service Teacher Mathematics Curricula in Germany and Taiwan Living in Parallel Worlds A Transatlantic Dialogue between General Didactics and Instructional Design *Electronic*

Learning Communities Issues and Practices Sorel Reisman, 2003-04-01 This book focuses on electronic learning communities created through the development and use of the Internet for instruction and training The chapters focus on philosophies background reviews technologies systems tools services strategies development implementation research and guidelines for implementers and each illustrates the chapter theme with a detailed example of best practices **Why Students Resist**

Learning Anton O. Tolman, Janine Kremling, 2023-07-03 However personally committed faculty may be to helping students learn their students are not always as eager to participate in this endeavor and may react with both active and passive resistant behaviors including poor faculty evaluations The purpose of this book is to help faculty develop a coherent and integrated understanding of the various causes of student resistance to learning providing them with a rationale for responding constructively and enabling them to create conditions conducive to implementing effective learning strategies In this book readers will discover an innovative integrated model that accounts for student behaviors and creates a foundation for intentional and informed discussion evaluation and the development of effective counter strategies The model takes into account institutional context environmental forces students prior negative classroom experiences their cognitive development readiness to change and metacognition The various chapters take the reader through the model s elements exploring their practical implications for teaching whether relating to course design assessments assignments or interactions with students The book includes a chapter written entirely by students offering their insights into the causes of resistance and their reflections on how participating on this project has affected them While of great value for faculty this book is also useful to faculty developers advising future and current faculty as well as to administrators offering insight into how institutional values impact teaching practice and student attitudes **Resources in Education** ,1999 Creating

Learning Centered Classrooms Frances K. Stage, Patricia A. Muller, Jillian Kinzie, Ada Simmons, 1998-05-14 This report reviews the literature on learning theories and frameworks applicable to instruction of undergraduate college students An introductory section provides an overview and discusses the importance of learning frameworks The first half of the volume addresses various theoretical frameworks in detail These include motivation theories including performance attribution and self efficacy and theories offering a social perspective such as social constructivism and conscientization Each theory is presented in terms of a case study which examines elements of the theoretical construct reviews relevant research on young adult and college student populations discusses the relationship of the framework to college students learning and identifies possible educational applications A separate section focuses on other theories which challenge assumptions about learning The second part of the monograph discusses the usefulness of these frameworks for studying and fostering academic learning One section addresses the need for more classroom based research on college student learning The final section applies the various theoretical frameworks to the classroom emphasizing the importance of diverse methods for presenting academic material activities to facilitate learning and multiple ways for students to demonstrate their learning Contains approximately 375 references DB

Teaching for Effective Learning in Higher Education N. Hativa, 2012-12-06 Research on teaching in higher education shows that students who are well taught learn more than students who are poorly taught and there are some teaching behaviors and strategies that are consistently associated with good teaching This book identifies these strategies and presents them within a theoretical framework that explains how they promote students active and meaningful learning By presenting teaching as a logical structure of interconnected behaviors whose contribution to student learning is based on theory and research the book promotes teachers pedagogical knowledge and their perception of teaching as scholarly intellectual work The book provides extensive practical advice that is based on the vast experience of the author as an instructional consultant and on research on accomplished teachers taken from the domains of education psychology and speech communication The practical ideas are separated from the theoretical part in a way that makes them easily identifiable The book also puts forth the voice of the students through authentic comments that they wrote in thousands of instructor evaluation forms that the author collected over many years
