Gass, 2013-08-21 Now in a fourth edition this bestselling introductory textbook remains the cornerstone volume for the study of second language acquisition SLA Its chapters have been fully updated and reorganized where appropriate to provide a comprehensive yet accessible overview of the field and its related disciplines To reflect current developments new sections on using learner corpora semantics and morphosyntax within formal approaches to SLA sociocultural approaches gesture priming research and chaos theory have been added Students will also find expanded discussions of heritage language learning bilingualism pragmatics and much more The redesigned fourth edition of Second Language Acquisition retains the features that students found useful in the current edition but also provides new pedagogical tools that encourage students to reflect upon the experiences of second language learners As with previous editions discussion questions and problems at the end of each chapter help students apply their knowledge and a glossary defines and reinforces must know terminology This clearly written comprehensive and current textbook by expert Sue Gass is the ideal textbook for the introductory SLA course

Language Acquisition and the Younger Learner Jenefer Philp,Rhonda Oliver,Alison Mackey,2008-10-01 This new volume of work highlights the distinctiveness of child SLA through a collection of different types of empirical research specific to younger learners Characteristics of children s cognitive emotional and social development distinguish their experiences from those of adult L2 learners creating intriguing issues for SLA research and also raising important practical questions regarding effective pedagogical techniques for learners of different ages While child SLA is often typically thought of as simple and often enjoyable and universally effortless in other words as child s play the complex portraits of young second language learners which emerge in the 16 papers collected in this book invite the reader to reconsider the reality for many younger learners Chapters by internationally renowned authors together with reports by emerging researchers describe second and foreign language learning by children ranging from pre schoolers to young adolescents in home and school contexts with caregivers peers and teachers as interlocutors **Typology and Second Language Acquisition** Anna

Giacalone Ramat,2011-07-11 In recent years research on comparative typology has led to reveal regularities and to formulate new constraints upon variation for a broad range of phenomena As the amount of typological research increased a growing interest arose for the implications that findings in the typological field might have on second language acquisition Written by

experts in the field of typology and or second language acquisition this volume addresses theoretical and empirical issues on structural domains such as relative clauses and possessive constructions as well as pragmatic considerations on information organization in learners productions *A Philosophy of Second Language Acquisition* Marysia Johnson,2008-10-01

divdivHow does a person learn a second language In this provocative book Marysia Johnson proposes a new model of second language acquisition SLA a model that shifts the focus from language competence the ability to pass a language exam to language performance using language competently in real life contexts Johnson argues that current SLA theory and research is heavily biased in the direction of the cognitive and experimental scientific tradition She shows that most models of SLA are linear in nature and subscribe to the conduit metaphor of knowledge transfer the speaker encodes a message the hearer decodes the sent message Such models establish a strict demarcation between learners mental and social processes Yet the origin of second language acquisition is located not exclusively in the learner s mind but also in a dialogical interaction conducted in a variety of sociocultural and institutional settings says the author Drawing on Vygotsky s sociocultural theory and Bakhtin s literary theory she constructs an alternative framework for second language theory research teaching and testing This approach directs attention toward the investigation of dynamic and dialectical relationships between the interpersonal social plane and the intrapersonal individual plane Johnson s model shifts the focus of SLA away from a narrow emphasis on language competence toward a broader view that encompasses the interaction between language competence and performance Original and controversial *A Philosophy of Second Language Acquisition* offers an introduction to Vygotsky s sociocultural theory and Bakhtin s literary theory both of which support an alternative framework for second language acquisition an examination of the existing cognitive bias in SLA theory and research a radically new model of second language acquisition DIV DIV **English Language Learning in the Asian Context 2nd Edn** Paul Robertson,2005
