Creating Cyber Libraries:

Creating Cyber Libraries Kathleen W. Craver, 2002-05-30 As prices of traditional library materials increase and space to house them shrinks savvy school library media specialists are creating cyber libraries or school libraries on the Internet. These libraries offer students and their parents 24 hour access and are invaluable for providing up to date information in a way traditional materials cannot. This guide outlines the steps library media specialists can take to create a cyber library, provide content and policies for use and maintain it for maximum efficiency. Craver justifies the need for cyber libraries in the 21st century and how they can help librarians to meet the standards in Information Power 1998. She explains the different types of cyber libraries available along with their advantages and disadvantages. She discusses how to construct them using portals or by acquiring fee based cyber libraries and what policies should be in place to protect both the school and its students. Also included are instructions for establishing remote access to subscription databases, creating cyber reading rooms and providing instructional services to student users. Once a cyber library is created it must be maintained and evaluated to keep it useful and current and this book provides guidelines to do so. Finally there is a chapter on promoting the cyber library so the school community is aware of its features and participates in its growth process. No school library should be without this volume.

Developing Cyber Libraries M. Sankara Reddy, 2006 M Sankara Reddy b 1945 librarian from Andhra Pradesh India contributed articles *Developing In-House Digital Tools in Library Spaces* Costello, Laura, Powers, Meredith, 2017-08-11 Library services are dependent on technology tools in order to host, distribute and control content. Today many libraries are creating, testing and supporting their own tools to better suit their particular communities. *Developing In House Digital Tools in Library Spaces* is a pivotal reference source with the latest empirical research on organizational issues, examples of library automation, case studies of developing library products and assessment of the impact and usefulness of in house technologies. Featuring coverage on a broad range of topics such as linked data, mobile applications and web analytics, this book is ideally designed for academicians, researchers, students and librarians seeking current research on technological products and their development in library use.

How Public Libraries Build Sustainable Communities in the 21st Century Kaurri C. Williams-Cockfield, Bharat Mehra, 2023-09-08 Public libraries through their mission, vision and position in the community play a significant part in building community sustainability and are already positioned to serve as a backbone support organization for collective impact initiatives.
