Creating Change capable Cultures:

Leading and Implementing Business Change Management David J. Jones, Ronald J. Recardo, 2013-07-18 Being change capable is the new normal for today's growth minded organizations. The do more with less strategies of the past are no longer effective in preparing organizations to meet the increasing challenges for growth, competitiveness and innovation required of them in this new era. Business change challenges including customer and market shifts, legal and regulatory requirements, strategic redirection, acquisitions, strategic partnerships and cultural transformation are demanding that organizations effectively and efficiently manage change across multiple dimensions. To reach this level of change capability, organizations must adopt an integrated, balanced and customized approach to change management. Change management is addressed from the unique perspective of both its foundational concepts as well as practical application. Using an integrated, scalable and flexible framework, this book provides tools which can be readily customized and applied to initiatives across or within stages of the business change management lifecycle, from assessing the need for change through planning the change initiative, designing a balanced change solution which integrates the people, process and project management elements through deploying and institutionalizing the change. Common risks associated with failed or stalled change initiatives are presented with best practices and key topics associated with change management are explored and illustrated through real life case studies. Aimed at both the professionals within organizations and post graduate students and researchers within business strategy, organizational behaviour and change management disciplines, this book will provide a conceptual understanding of change management and a roadmap with a supporting toolbox for leading and implementing change that sticks.

Transforming Public and Nonprofit Organizations James E. A comprehensive approach to leading change, *Transforming Public and Nonprofit Organizations: Stewardship for Leading Change* provides public and nonprofit leaders and students of leadership management and organizational change with theoretical knowledge and practical tools for accomplishing change goals while protecting the broader public interest. This insightful and useful guide offers an introduction to the change oriented leadership concept, transformational stewardship, an easy to follow model for initiating change in the public interest, case studies, practical tips and resources for additional learning, an organizational assessment instrument to gauge readiness for major change, a 360 degree assessment instrument to identify individual leadership strengths and areas for improvement.

Entrepreneurship is often considered only in the context of new venture creation, small business issues, and the profiles and personalities of individual entrepreneurs. The emphasis in *Creating and Re-Creating Corporate Entrepreneurial Culture* is very much on the corporate; it focuses on the creation and maintenance of an entrepreneurial management culture that accelerates growth and enhances effectiveness and competitiveness in large organizations. Alzira Salama explains what constitutes entrepreneurial behaviour, how it is facilitated by organizational culture, and why entrepreneurial corporate culture is fundamental to business success. She takes you through ways of identifying prevailing cultures and explains how cultures are reinforced or changed. Drawing on exemplary case studies from around the world, she tells the stories both of successful and unsuccessful interventions made in response to the need to move on from bureaucratic or authoritarian cultures. These include specific instances where the context has been privatization, merger and acquisition, transition in the wider economy, or a combination of any of these circumstances. This enlightening book will help managers and consultants, business educators, higher level students, and those on executive programmes to understand the nature of an organization's culture, why it is as it is, whether it needs to change, and how it might be changed. Alzira Salama offers real world examples of how to create or re-create an entrepreneurial culture together with tools that will enable corporations to achieve it.
