Bartee, 2008-12-01 The failure of American education to achieve racial diversity has resulted from the inability of educational researchers policy makers and judicial officials to disentangle the complex definitions that have emerged in a post segregated society More specifically the capricious aim of post segregated educational settings leads to the confusing and often conflicting interchangeable usage of terms desegregated integrated and diversity This ambiguity is further confounded by the imprecise definitions of equity equality and opportunity The proposed book will examine the role of language post Brown v Board of Education and the effects of that language on educational policy and practice He also examines how the fundamental implications of language within post Brown court cases in pre through post secondary education demonstrate the unspecified outcomes for desegregation and integration while concomitantly demand an educational continuum of equitable distribution The arguments will further interrogate how education policy and practices implicitly contain a scholarly roadmap to forge equal opportunity and access fifty years after Brown

Radicalizing Educational Leadership Ira Bogotch, Floyd Beachum, Jackie Blount, Jeffrey Brooks, Fenwick English, 2008-01-01 What you will

find inside this provocative text It should come as no surprise as the collection of papers in this book show that we are up against it Killing those we despise has become normative in the political minds of both the powerful and the marginalised Framing those who are weakest as the architects of their own disgusting state it has become commonsense in all societies rich and poor Any counter hegemonic project that seeks to rethink social justice and reframe educational leadership is without question confronting the enormous power of ordinariness the commonsense about power inequality and violence Jonathan Jansen By virtue of an institutionalized hegemony the formal scales of social justice are informally tipped in favor of the haves leaving the have nots at a distinct disadvantage and often powerless and defenseless to effect change for themselves or others How do these critical perspectives change our vision of public schools and of educational leadership Suddenly new dynamics emerge race matters gender matters sexual orientation matters ethnicity matters class matters power matters money matters agency matters etc Jeffrey Brooks Historical research is one important way that individuals can heighten their awareness of their own conditions It can inspire understanding that compels social justice leadership on account of one's status It can assist potential allies in learning how their own lived experiences of oppression might translate to persons experiencing subjugation along other social dimensions It can accomplish these ends by provoking us to ask better questions to understand larger patterns more deeply and to find inspiration in the infinitely varied stories of human frailty and courage Jackie Blount To illustrate social injustice we have to look backwards But our graduates are not going to work in the past So it isn't enough to work to undo socially unjust practices The more complex question surrounding making social justice a thematic anchor and connector of an educational leadership program is the requirement to create within a theoretical framework in which the effects of a curriculum can be empirically assessed and which can serve as an holistic and heuristic model by which graduate students can engage in a gestalt view approach to leading schools and school systems in very different directions than before Fenwick English History of Special Education Anthony F.
