**Financial Sector Reform in China** Yasheng Huang,Tony Saich,Edward Steinfeld,2020-10-26 An edited volume consisting of an introduction by the editors and eleven additional

papers on China's financial system and financial sector reform. The papers originated at a conference on financial reform in China held at the John F. Kennedy School of Government, Harvard University, in 2001. They were then thoroughly revised and updated for publication.     **Deposit Insurance**, 2000     **Financial Structure and Stability** Alexander

Karmann, 2012-12-06. The basic question of this book is what we can learn from empirical as well as theoretical analysis of financial systems differing cross sectionally and changing structurally over time with respect to the issue of stability of financial systems. Part I of the book deals with stability issues in a globalizing financial world and addresses topics of convergence, domestic policy, financial bubbles, crises, and international coordination. Part II is on banking systems. Country-specific adoption and restructuring of universal but also separation banking systems are key problems for the industrialized economies, while catching up is of major concern for the economies in transition. Feeble regional economies and subsidized banking is at the heart of the vivid dispute on public sector banking being taken up in Part III. The last Part is devoted to resource-oriented approaches in quantifying financial development and risk of sovereign default.     **Restructuring,**

**Stabilizing and Modernizing the New Russia** Paul J.J. Welfens, Evgeny Gavrilenko, 2012-12-06. Russia has embarked upon a difficult process of systemic transformation and economic opening up. While the initial strong GDP decline seemed to have ended in 1997, the real development was facing even more difficult problems as output declined sharply after the Ruble and banking crisis of August 1998, inflation started to increase again, exports and imports were falling, capital flight increasing, and unemployment rising. There is broad disappointment in Russia regarding the transformation failure in 1998, since so many people had hoped that the end of the Soviet command economy would bring democracy, prosperity, and international integration. While Poland has been able to double per capita income in the 1990s, it has fallen by 50% in Russia, and this despite considerable IMF involvement and some modest support from other international organizations. What were the reasons for transformation failure in the 1990s? What are the ingredients for long-term sustainable transformation? What are the internal and international requirements to avoid a second, possibly tragic, failure of transformation in Russia? An international group of researchers has focussed on these problems during a two-year research project financed by the Alfred Krupp von Bohlen und Halbach Foundation. A series of papers were presented at workshops in Potsdam, Bonn, and Moscow in 1999, where this book is devoted to four important issues: the Russian transformation crisis, the topic of restructuring, the need for stabilizing Russia, and the requirements for modernizing Russia.     **Economies in Transition** G. Roland, 2011-12-13. The

twentieth anniversary of the fall of the Berlin Wall saw many reflect on the political, economic, and social changes of recent years. The legacy of communism and the economic prospects of post-communist countries are rigorously analysed in this stimulating study of the long-term consequences of transition.     *Banking and Monetary Policy in Eastern Europe* Adalbert Winkler, 2016-01-26. At the beginning of the transition process, the countries of Central and Eastern Europe faced the task of creating a functioning financial system where none had existed before. A decade later, high-level practitioners and well-known

experts take stock of banking and monetary policy in the region centring on the governance of banks the spread of financial crisis and perspectives for monetary policy and banking sector development      **Unravelling The Persistence of**

**Dollarization** Ia Eradze,2023-06-22 This volume engages with the roots dimensions and implications of foreign currency domination in states with a national currency Referred to as unofficial dollarization in literature this is a worldwide phenomenon among developing countries and has a long history This monograph provides a political economic analysis of dollarization in Georgia and is structured around three themes the genesis of dollarization 1991 2003 the persistence of dollarization 2003 12 and the politicization of dollarization 2012 19 The case of Georgia is especially representative of the post socialist transition states but also has wider applicability A high level of dollarization is a significant barrier to economic growth macroeconomic and political stability functional monetary policy as well as social welfare The Covid 19 crisis and the increasing debt of developing countries in foreign currency exacerbate dollarization related vulnerabilities for these economies This book will be of interest to postgraduate students in global comparative political economy development economics or transition economies researchers in monetary sovereignty central banking exchange rate policies currency hierarchy money financialization and policy makers in dollarized countries and global institutions      **The World Economy**

Horst Siebert,2002-01-31 The World Economy provides an analysis of global economic structures and processes Horst Siebert breaks new round in taking the widest possible view of the world economy and examining it as a truly global entity Individual chapters provide a comprehensive state of the art overview of core issues and themes including world GDP world aggregate demand economic growth the role of trade global product and factor markets world monetary and financial markets and exchange rates regional integration NAFTA and the European Union The book also explores potential conflicts between national interests and global concerns trade policy versus free trade locational competition amongst states The World Economy also provides authoritative overviews of the most recent developments in global economics from EMU to the East Asian crisis      International Capital Flows: Economic Problems and Policy Implications Nina Pohl,2000-09-01

Inhaltsangabe Abstract This paper deals with three highly controversial aspects in the international finance literature the degree of international financial integration the economic impact of capital mobility and the potential role of capital controls in the emerging international financial architecture Regarding the first aspect many observers have been influenced by the recent hype about globalisation and in fact take it for granted that capital markets have become almost fully integrated into a world financial marketplace This paper reviews evidence that challenges this conventional wisdom though confirming that the degree of international financial integration is rising With respect to the second aspect it is demonstrated that there are circumstances under which the free flow of international capital could negatively impact upon economic performance and or otherwise welfare enhancing domestic policies This finding conflicts with traditional theory and provides an economic rationale for the judicious introduction of capital controls With this assertion in mind the final aspect the role of capital

controls is investigated The specific question explored is how far restrictions on international capital flows are able to avert a costly economic imbalance arising from fluctuations in the balance of payments Although the international consensus seems to have shifted in recent years towards promoting Chilean style capital controls as a potential new building block in the international financial landscape this paper cautions against such a generalisation of the Chilean experience Rather a review of the empirical literature suggests that much of Chile s economic success story in the last decade can be explained by factors other than its control regime The rising degree of international financial integration enhances the need for small countries to resolve their dilemma of being dependent on external funding and at the same time most vulnerable to sudden reversals of international capital flows Yet simple solutions of how to counterbalance the potential threats of capital mobility in a second best equilibrium are not found to be easily forthcoming In particular this paper argues that capital controls are no panacea even less so if they delay necessary macro and microeconomic reforms A worrying feature of the international financial system partly due to continued innovations in financial engineering is that

Die russische Finanzkrise des Jahres 1998 wies nicht nur Züge einer klassischen Währungskrise auf sondern war auch Ausdruck der inkonsistenten Reformen des Finanzsektors Obwohl das tiefgreifende Spannungsverhältnis zwischen der nur partiell durchgesetzten Zahlungswirtschaft im Inland und einer dynamisch ansteigenden Auslandsverschuldung spätestens mit der Währungskrise sichtbar wurde fehlte bislang eine umfassende Untersuchung der Funktionsbedingungen des russischen Finanzsektors Die Autorin versucht diese Lücke zu schließen Auf der Grundlage von Modellen finanzieller Entwicklung wird untersucht welche Auswirkungen die im Zuge der Transformation notwendige Liberalisierung des Finanzmarktes gegenüber unterschiedlichen staatlichen Eingriffen in Finanztransaktionen finanzielle Repression auf das Wachstum hat Anknüpfend an die Argumentation von Pagano und King Levine endogene Wachstumstheorie zeigt sie die Zusammenhänge zwischen den durch finanzielle Repression verursachten Transaktionskosten auf dem Finanzmarkt und der Ausweitung quasi fiskalischer Aktivitäten auf Die Analyse der Funktionen des Geldes aber auch des Finanzsektors in der zusammenbrechenden Sowjetunion läßt erkennen daß bereits während der Perestrojka Erscheinungsformen finanzieller Repression die klassische Planwirtschaft substituierten und den indirekten staatlichen Zugriff auf die Ressourcen sicherten In der Russischen Föderation wurde nach Transformationsbeginn an diese Tradition angeknüpft Staatlich induzierte preferentielle Kredite Devisenmarktregulierungen sowie Inflationssteuer aber auch der schwache Schutz der Gläubigerrechte die staatliche Tolerierung der Nichtzahlung und eine diskretionäre Steuerpolitik sind Beispiele hierfür Mechthild Schrooten zeigt daß diese Art der Wirtschaftspolitik die Investitionstätigkeit das gesamtwirtschaftliche Wachstum sowie den Übergang auf eine funktionsfähige Zahlungswirtschaft maßgeblich behinderte
