It examines such issues as the impact of Neoliberalism the pursuit of the socially just school and imagining contemporary schools beyond their consumerist mentality. Tackling development in the growing economic and social crisis in Europe and offering transformative analysis of the psychology and decision making involved for innovating teaching learning socio economic and policy contexts. In addition the book shows different ways young people can be creatively involved in reimagining schooling. It also details both innovative and radical ideas that currently exist about school transformation such as building learning partnerships for all and creating synergies across formal and informal settings of learning. Raising important questions for the future of the relationship between teacher and pupil and positive and pro active behavior. There is a growing realization that schools fail to accommodate diverse types of learning and that their purpose is not simply about education.
