NeSmith, 2020-07-09 Schools are built and operated from a particular angle or philosophy For example Thomas Jefferson American forefather and past President of the United States believed that education was needed to rake the good individuals from the bad ones John Dewey a pragmatic wanted to cultivate students with social and acceptable attitudes so as to make them good citizens Horace Mann the Father of American Education advocated public education so that all could be educated without concern for cost or availability He believed real democracy would demand an educated citizen However such good and noble philosophical reasons have all but gone by the wayside in our current modern era of educating America's children Though some educators and citizens can produce some modified version of why children need to be educated much has been lost In 1950 W Edwards Deming was invited by General Douglas McArthur to help Japan recover from World War 2 As an American engineer Deming focused on how to utilize research and data to restructure a weak nation He longed for Japan to become a prosperous industrial nation His philosophy emphasis on data and developed principles were well received and Japan did become one of the world's industrial leaders and even today that legacy remains In this book the author addresses the Deming principles with applications being made to education and the American Public School system Leaders who become principle driven are more consistent fairer and produce schools that are better equipped to teach and train effective teachers and successful students The purpose of this study is to help prod school leaders principals assistant principals department heads and lead teachers to look beyond the status quo of leading by whims or worse by the seat of the pants Principle driven people are more predictable more democratic and more likely to be successful in bringing about changes needed to help public education train the minds and hearts of American children Dr Richard A NeSmith *Roles for Education Paraprofessionals in Effective Schools* ,1997 **Effective Schools in Developing Countries (RLE Edu A)** Henry Levin, Marlaine Lockheed, 2012-05-31 This volume brings together eight case studies which describe a variety of initiatives to create more effective schools for children of poverty especially in the Third World The initiatives reviewed published and unpublished documents and both qualitative and statistical studies were examined Countries include Brazil Burundi Colombia Ghana Nepal Sri Lanka Thailand and the United States Each initiative was developed independently to
