The Creation of Patriarchy: The creation of feminist consciousness Gerda Lerner,1986 A major new work by a leading historian and pioneer in women s studies The Creation of Patriarchy is a radical reconceptualization of Western civilization that makes gender central to its analysis Gerda Lerner argues that male dominance over women is not natural or biological but the product of an historical development begun in the second millennium B C in the Ancient Near East As patriarchy as a system of organizing society was established historically she contends it can also be ended by the historical process Focusing on the contradiction between women s central role in creating society and their marginality in the meaning giving process of definition and interpretation Lerner explores such fascinating questions as What can account for women s exclusion from the historical process What could explain the long delay more than 3 500 years in women s coming to consciousness of their own subordinate position She goes back to the cultures of the earliest known civilizations those of the ancient Near East to discover the origins of the major gender metaphors of Western civilization Using historical literary archaeological and artistic evidence she then traces the development of these ideas symbols and metaphors and their incorporation into Western civilization as the basis of patriarchal gender relations Publisher description *The Art of Life* Gillian E. Popularizing the Past Nick Witham, 2023-07-26 *Popularizing the Past* tells the stories of five postwar historians who changed the way ordinary Americans thought about their nation's history What's the matter with history For decades critics of the discipline have argued that the historical profession is dominated by

scholars unable or perhaps even unwilling to write for the public In *Popularizing the Past* Nick Witham challenges this interpretation by telling the stories of five historians Richard Hofstadter Daniel Boorstin John Hope Franklin Howard Zinn and Gerda Lerner who in the decades after World War II published widely read books of national history Witham compellingly argues that we should understand historians efforts to engage with the reading public as a vital part of their postwar identity and mission He shows how the lives and writings of these five authors were fundamentally shaped by their desire to write histories that captivated both scholars and the elusive general reader He also reveals how these authors efforts could not have succeeded without a publishing industry and a reading public hungry to engage with the cutting edge ideas then emerging from American universities As Witham s book makes clear before we can properly understand the heated controversies about American history so prominent in today s political culture we must first understand the postwar effort to popularize the past

Women and Art in Early Modern Europe: Patrons, Collectors, and Connoisseurs, 1999 This anthology reflects a larger impulse to recover women s involvement in the creation of an aesthetic culture from the late medieval through the early modern periods By asking how the perspectives and experiences of female patrons contributed to the invention of particular styles or

iconographies or how they shaped taste or how they influenced demand these twelve original essays introduce significant new information about specific women patrons while raising theoretical issues for patronage studies more generally While most of the projects discussed are consistent with the period's male sanctioned concept of female patronage as an expression of conjugal devotion or dynastic promotion at the same time the women involved devised strategies that circumvented these rules allowing them to explore the potential of art as a means of proclaiming their own identity and taste
