Creative Creatures Ulf Görman, Willem B. Drees, Hubert Meisinger, 2005-01-01 This is the third volume published in association with ESSSAT in the Issues in Science and Theology series This volume focuses on two topics that have so far received little attention in the growing field of science and theology i e ethical matters and issues raised by the technological applications of scientific knowledge The book s main themes are Technology s impact on our worldview Morality nature and culture Morality in a technological society The book is a selection of contributions to the ESSSAT conference in Nijmegen on Values and Ethical Issues in Theology Science and Technology The essays have been selected on the basis of quality and revised in order to create a comprehensive and carefully focused volume Human Identity at the Intersection of Science, Technology and Religion Christopher C. Knight, 2016-05-13 Humans are unique in their ability to reflect on themselves Recently a number of scholars have pointed out that human self conceptions have a history Ideas of human nature in the West have always been shaped by the interplay of philosophy theology science and technology The fast pace of developments in the latter two spheres neuroscience genetics artificial intelligence biomedical engineering call for fresh reflections on what it means now to be human and for theological and ethical judgments on how we might shape our own destiny in the future The leading scholars in this book offer fresh contributions to the lively quest for an account of ourselves that does justice to current developments in theology science technology and philosophy *A Modern Relation of Theology and Science Assisted by Emergence and Kenosis* Bradford McCall, 2018-02-28 How should we attempt to understand the relationship between theology and science in the twenty first century In this book I will attempt to answer this question by examining several previous attempts to classify this relationship I also develop my personal view of the relation thereafter discussing some Catholic contributions to this project and then revisit some of my previously published material highlighting the role of panentheism therein and noting an emergent implication from the literature the resultant possibilities for God an implication that creates space for a broadly relational perspective of the process of emergence These movements allow me to argue that kenosis and emergence can add to the discussion of understanding the theology and science relationship Herein I

advocate a monistic process based view of the overlapping relationship between theology and science **Human Identity at the Intersection of Science, Technology and Religion** Dr Christopher C Knight, Professor Nancey Murphy, 2013-06-28 Humans are unique in their ability to reflect on themselves Recently a number of scholars have pointed out that human self conceptions have a history Ideas of human nature in the West have always been shaped by the interplay of philosophy theology science and technology The fast pace of developments in the latter two spheres neuroscience genetics artificial intelligence biomedical engineering call for fresh reflections on what it means now to be human and for theological and ethical judgments on how we might shape our own destiny in the future The leading scholars in this book offer fresh contributions to the lively quest for an account of ourselves that does justice to current developments in theology science technology and philosophy **Science, Religion, the Humanities and Hope** Anne Runehov, Michael Fuller, 2024-03-19 This book collects a multidisciplinary range of contributions focusing on the prolific and seminal work of Willem Drees in the fields of philosophy of religion philosophy of the humanities and science and theology religion Trained in both theoretical physics and theology philosophy of religion Drees holds doctoral degrees in both theology and in philosophy and amongst other distinguished positions held professorships at the University of Leiden and at the University of Tilburg Drees was also Editor in Chief of Zygon Journal of Religion Science between 2008 and 2018 and served as President of the European Society for the Study of Science and Theology ESSSAT between 2002 and 2008 In 2018 he was elected as member of the Royal Holland Society of Sciences and Humanities KHMW This contributed volume builds on Drees expansive and provocative scholarly contributions notably around the concept and meaning of naturalism and the humanities to the fields of science and religion as exemplified by his works Religion Science and Naturalism 1996 and What Are the Humanities For 2021 In a time where more and more young people across the globe are entering higher education such cross disciplinary explorations and re evaluations are vital to the field Accordingly by approaching his work from a variety of disciplines this collection illuminates the broad reach of Drees work and provides scholars from various fields with many new and rich opportunities avenues for research **Wisdom Or Knowledge?** Willem B. Drees, Hubert Meisinger, Zbigniew Liana, 2006-01-01 Considers various interactions between science theology and culture from the viewpoints of philosophy ethics ecology hermeneutics history and Eastern Orthodoxy This volume embodies the variety of perspectives from different cultural backgrounds and reflects the role of culture on the meta level of writing and reading **The Groaning of Creation** Christopher Southgate, 2008-01-01 Pain suffering and extinction are intrinsic to the evolutionary process In this book Christopher Southgate shows how the world that is very good is also groaning in travail and subjected by God to that travail Southgate then evaluates several attempts at evolutionary theodicy and argues for his own approach an approach that takes full account of Gods self emptying and human beings special responsibilities as created cocreators Christopher Southgate is Honorary University Fellow in Theology at the University of Exeter England and Visiting Scholar at the Graduate Theological Union in

Berkeley California Originally trained as a biochemist at the University of Cambridge he is the general editor and principal author of *God Humanity and the Cosmos* 3rd ed *Issues in Science and Theology: Are We Special?* Michael Fuller, Dirk Evers, Anne Runehov, Knut-Willy Sæther, 2017-10-23 This book offers a penetrating analysis of issues raised by the perennial question Are We Special It brings together scholars from a variety of disciplines from astronomy and palaeontology to philosophy and theology to explore this question Contributors cover a wide variety of issues including what makes humans distinct from other animals the possibilities of artificial life and artificial intelligence the likelihood of life on other planets and the role of religious behavior A variety of religious and scientific perspectives are brought to bear on these matters As a whole the book addresses whether the issue of human uniqueness is one to which sciences and religions necessarily offer differing responses *Future Perfect?* Celia Deane-Drummond, Peter Manley Scott, 2010-02-02 **Religion and the Digital Arts** Sage Elwell, 2020-12-07 This slim volume offers a thematic exploration of religion and the digital arts Over the course of six brief sections this extended essay examines identity and community authority and authenticity word and image ritual and practice body and space and myth and faith Each of these paired sets is explored in concert with technologically inflected correlates For instance identity and community are paired with avatars and networks These twin concepts provide the thematic anchor of each section Each section looks at four works of digital art with each work employing digital technology in a unique way The works include virtual and augmented reality pieces 3D printed sculptures digital photography and digitally enabled performance pieces and installations and span the late 1990s to the present This essay is an introduction to religion and the digital arts and while no single conclusion can be drawn from such an expansive and diverse field the reassertion of the religious and theological importance of the body and emotions in the face of digital technology emerges as a recurrent theme Theology and the Body Stephen Garner, 2011-12-31 The human body is the primary lens through which we view encounter and engage the world around us It is no surprise then to find a wide range of theological reflection upon the human body from those that affirm the human body as something very good through to other more negative views where the body is something to be marginalised or escaped from The body and theology also meet in conversations over body mind and soul gender disability eschatology race and culture sexuality Christology and medicine and technology to name but a few Each of the authors in this volume pick up the theme of embodiment as the lens through which they look at an aspect of theology and body providing an engaging window onto some of these discussions The Digitalised Image of God Ximian Xu, 2024-10-08 This book focuses on the idea of the imago Dei to engaging theologically with artificial intelligence AI It reflects on how enormous progress in the development of AI has raised some challenges to Christian theology Questions explored include is AI created in the imago Dei If so does AI challenge the uniqueness of the human being as the imago Dei If not could AI be incorporated into human communities as a human companion in the same way as a natural human person Would AI eventually develop to have human level consciousness and be capable of performing liturgies

and ethical actions Bringing to light the radical distinction between the imago Dei and the imago hominis the book constructs a theo ontological foundation for AI and draws on the Reformed theology of archetype ectype as a metaphysical tool to deploy a holistic account of the imago Dei in theology AI dialogues The author argues that the imago Dei is the signifier of the beginning both of God human stories and stories of human ethical performances towards others From the perspective of the image of the imago Dei it can be argued that AI can somehow participate into the narration of these religious and ethical stories This book will be of particular interest to scholars of theology and those working in the field of religion and science technology

Is Religion Natural? Dirk Evers,Michael Fuller,Antje Jackelen,Taede Smedes,2012-10-06 An exploration of the relationship between evolutionary psychology naturalism and theological reflections published by ESSSAT the European Society for the Study of Science and Theology

Cyborg Theology Scott A. Midson,2017-10-30 In particular Donna Haraway argued in her famous 1991 Cyborg Manifesto that people since they are so often now detached and separated from nature have themselves evolved into cyborgs This striking idea has had considerable influence within critical theory cultural studies and even science fiction where it has surfaced for example in the Terminator films and in the Borg of the Star Trek franchise But it is a notion that has had much less currency in theology In his innovative new book Scott Midson boldly argues that the deeper nuances of Haraway s and the cyborg idea can similarly rejuvenate theology mythology and anthropology Challenging the damaging anthropocentrism directed towards nature and the non human in our society the author reveals through an imaginative reading of the myth of Eden how it is now possible for humanity to be at one with the natural world even as it vigorously pursues novel post human technologies

Creation's Diversity Willem Drees,Hubert Meisinger,Taede Smedes,2008-05-01 This collection of substantial essays explores the question of how to relate environmental engagement in the context of religious convictions In the first part of the book A Diversity of Visions of Creation six essays address various views of creation In the second part of the book Sustaining Creation s Diversity the concept of sustainability is analyzed critically given the dynamic character of natural reality as unveiled by the sciences This is followed by some reflections on ethical and theological considerations regarding the idea that we ought to sustain diversity

Moral Machines Wendell Wallach,Colin Allen,2008-11-19 Computers are already approving financial transactions controlling electrical supplies and driving trains Soon service robots will be taking care of the elderly in their homes and military robots will have their own targeting and firing protocols Colin Allen and Wendell Wallach argue that as robots take on more and more responsibility they must be programmed with moral decision making abilities for our own safety Taking a fast paced tour through the latest thinking about philosophical ethics and artificial intelligence the authors argue that even if full moral agency for machines is a long way off it is already necessary to start building a kind of functional morality in which artificial moral agents have some basic ethical sensitivity But the standard ethical theories don t seem adequate and more socially engaged and engaging robots will be needed As the authors show the quest to build machines that are capable of telling right from wrong has begun

Moral Machines is the first book to examine the challenge of building artificial moral agents probing deeply into the nature of human decision making and ethics *How Do We Know?* Dirk Evers,Antje Jackelen,Taede Smedes,2010-04-15 A study on the relationship between science and theology with respect to epistemological differences between religious belief and scientific knowledge *Jewish Faith and Modern Science* Norbert M. Samuelson,2008-10-17 In Jewish Faith and Modern Science renowned Jewish philosopher and rabbi Norbert Samuelson argues that modern Jewish philosophy has died_that it has failed to address the challenges to traditional beliefs posed by scientific advances and is therefore no longer relevant to Jews today Samuelson confronts these challenges head on critically reflecting on how all of the forms of contemporary Judaism from orthodox to liberal to secular to new age can address questions raised by the latest scientific advances Considering questions ranging from the existence of the soul to the relationship between God and particle physics to the debate over when life begins and ends Samuelson paves the way for a rebirth of Jewish philosophy applicable to life in the modern world

The Top Books of the Year Creative Creatures Values And Ethical Issues In Theology Science And Technology The year 2023 has witnessed a remarkable surge in literary brilliance, with numerous captivating novels captivating the hearts of readers worldwide. Lets delve into the realm of popular books, exploring the fascinating narratives that have charmed audiences this year. Creative Creatures Values And Ethical Issues In Theology Science And Technology : Colleen Hoover's "It Ends with Us" This touching tale of love, loss, and resilience has captivated readers with its raw and emotional exploration of domestic abuse. Hoover expertly weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can prevail. Uncover the Best : Taylor Jenkins Reid's "The Seven Husbands of Evelyn Hugo" This intriguing historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reid's compelling storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. Creative Creatures Values And Ethical Issues In Theology Science And Technology : Delia Owens' "Where the Crawdads Sing" This evocative coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens spins a tale of resilience, survival, and the transformative power of nature, entrancing readers with its evocative prose and mesmerizing setting. These bestselling novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of engaging stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a brilliant and suspenseful novel that will keep you wondering until the very end. The novel is a warning tale about the dangers of obsession and the power of evil.
