Aging And Adult Development In The Developing World:

Aging and Adult Development in the Developing World Frank E. Eyetsemitan, James T. Gire, 2003-02-28 Most studies of human development in developing societies have focused on the childhood stage and in a few cases exploration has extended up to adolescence since this age group represents about half the population in developing societies The developed world however is experiencing a surge in the elderly population and this has spurred its study There is growing recognition that studies are needed in order to understand aging in all contexts and to discover how the experience may differ in developing and developed societies In this book the authors discuss the appropriateness or inappropriateness of applying Western theories and perspectives to studies of aging in the developing world The present study critically examines the major theories in the area of aging and adult development covering such domains as the physical psychological and social aspects of aging death and dying and social and public policies Applying the concepts of individualism and collectivism as well as the global and environmental dimensions of the developing world the authors have earmarked the theories that seem suitable only to the developed world and those that appear to be universally relevant

Susan Krauss Whitbourne, Stacey B. Whitbourne, 2010-10-18 The fourth edition continues to provide psychologists with a fresh and engaging approach to the field of psychology of adult development and aging It focuses on three themes a multidisciplinary approach positive images of aging and the newest and most relevant research Recent articles and updates to the information on demography economics and public policy are presented The Aging in the News feature includes a story of a remarkable achievement by a middle aged or older adult The Assess Yourself boxes are also updated with new questions Psychologists appreciate this mix of examples and discussions that make the material come to life

Strategies for

Sustainable Transformation of Developing Countries Mark Izevbekhai, 2015-12-11 Strategies for the Sustainable Transformation of Developing Countries attempts a holistic solution approach through sustainable development concepts and principles to address challenges in developing countries In fact the book is the application of sustainable development and thus it offers strategies that could be applied to the development and transformation of social economical and environmental dimensions of society using the example of Nigeria a developing country in West Africa The book is divided into five parts covering critical subjects of development which include education government and good governance community security leadership and community development It provides answers to how sustainable development can bring change and benefits to these subject matters within the context of developing countries using Nigeria as an example This book is very different from many other book written on the challenges of development particularly on African countries in the sense that it gives priority to solutions and mapping them out in a feasible sustainable and practical way The cornerstone of the book is the emphatic suggestion of a national transition initiative programme and Sustainable Community development Programme to drive sustainable development from the top and the bottom of society respectively

a result of market pressures and the 2008 financial crisis precipitated by the crash of the housing market all have economic implications for older people. They are also likely to make it more difficult for certain groups of future retirees to find their retirements at the level that they had planned and would like. To deal effectively with the challenges created by population aging it is vital to first understand these demographic economic and social changes and to the extent possible their causes consequences and implications. Sociology offers a knowledge base a number of useful analytic approaches and tools and unique theoretical perspectives that can be important aids to this task. The Panel on New Directions in Social Demography Social Epidemiology and the Sociology of Aging was established in August 2010 under the auspices of the Committee on Population of the National Research Council to prepare a report that evaluates the recent contributions of social demography social epidemiology and sociology to the study of aging and seeks to identify promising new research in these fields. Perspectives on the Future of the Sociology of Aging provides candid and critical comments that will assist the institution in making the final published volume as sound as possible and to ensure that the volume meets institutional standards for objectivity evidence and responsiveness to the study charge.

Recent advances in theory research and practice however have made it clear that an important reciprocal relationship exists between them. Advances in development frequently lead to learning and conversely learning quite often fuels development. The synchronicity between development and learning is responsible for positive changes in many capacities including insight intelligence reflective and meta cognition personality expression interpersonal competence and self efficacy. This synchronicity is also leading to the growth of a new discipline at the borders of adult development and learning. The Handbook of Adult Development and Learning is the first to bring together the leading scholars from both adult development and learning to explore what will form the foundation for this new discipline the latest research at the intersection of these fields. It examines six major aspects of their intersection foundations key areas of integration the self system higher reaches of development and learning essential contexts and specific applications. An introductory chapter explains why it is so important to recognize and fuel the growth of this new discipline. Subsequent chapters review the latest theoretical and empirical literature and provide a rich itinerary for future research. This handbook is a must read for all who promote optimal aging. It will be an invaluable reference for scholars in development and education as well as rich resource for policy makers and practitioners such as corporate executives and human resource personnel.
