David Michael Singleton

Aging Vol 3 A Challenge To Science And Society Behavioral Sciences And Conclusions:

Normal Human Aging Gerontology Research Center (U.S.),1984 **The Emotional and Sexual Lives of Older People** H. B. Gibson,2013-12-14 *Aging, a Challenge to Science and Society* D. Danon,Nathan Wetherill Shock,Maurice Marois,1981 Old Age Haim Hazan,1994-04-28 Haim Hazan is a leading specialist on old age in anthropology and has published several books on particular communities of old people The latest book is an essay on the realities of old age as it is experienced as opposed to the ideas about the old current in western societies It argues that the construction of this world by outsiders is inevitably affected by deeply ingrained social attitudes and structures such as the spatial segregation of the aged as a population and the fear of death with which they are associated By approaching the subject from the social constructionist perspective and by drawing on a variety of detailed ethnographic accounts the author describes a unique and nuanced social world This is a sophisticated and original book which should have a significant impact on a field still dominated by a social problems approach **Exploring the Second Language Mental Lexicon** David Michael Singleton,1999-02-11 This volume provides a review of L1 and L2 lexical research issues as well as new research **The Age Factor in Second Language Acquisition** David Michael Singleton,Zsolt Lengyel,1995-01-01 This book takes a hard look at some of the assumptions that are customarily made concerning the role of age in second language acquisition The evidence and arguments the contributors present run counter to the notion that an early start in second language learning is of itself either absolutely sufficient or necessary for the attainment of native like mastery of a second language Another theme of the book is a doubt that there is a particular stage of maturity beyond which language learning is no longer fully possible In short the book presents a challenge to those who take it as given that second language learning is inevitably different in its essential nature from language acquisition in the childhood years and that second language knowledge acquired beyond the critical period is in all circumstances and in all respects doomed to fossilize at a non native like level
