Aging In A Technological Society:

Aging in a Technological Society Gari Lesnoff-Caravaglia, 1988 **Aging and Technological Advances** Pauline K. Robinson, Judy Livingston, James E. Birren, 2012-12-06 The chapters and reports in this publication have been selected from presentations at a Symposium on Aging and Technological Advances held in August 1983 at the Ethel Percy Andrus Gerontology Center of the University of Southern California The Symposium was made possible by a grant from the NATO Special Programme Panel on Human Factors and the support of this program is gratefully acknowledged Members of the Symposium Advisory Board were James E Birren Judy Livingston Erhard Olbrich Victor Regnier Pauline Robinson Thomas Singleton Arnold Small Harvey Sterns and Alvar Svanborg Professor Lambros Houssiadis also provided invaluable encouragement Appreciation is also extended to the Andrew Norman Institute for Advanced Study in Gerontology and Geriatrics for support of planning activities leading up to the Symposium and for support of events surrounding the Symposium itself A generous gift from The UPS Foundation to the Ethel Percy Andrus Gerontology Center made possible the compilation editing and preparation of this manuscript and helped to support Symposium activities We thank David Bergstone and Mary Margaret Ragan who together carefully and skillfully organized and carried out the typing of the manuscript

The Good Life in a Technological Age Philip Brey, Adam Briggles, Edward Spence, 2012 Modern technology has changed the way we live work play communicate fight love and die Yet few works have systematically explored these changes in light of their implications for individual and social welfare How can we conceptualize and evaluate the influence of technology on human well being Bringing together scholars from a cross section of disciplines this volume combines an empirical investigation of technology and its social psychological and political effects and a philosophical analysis and evaluation of the implications of such effects

The Art of Living for A Technological Age Ashley John Moyse, Scott A. Kirkland, 2021-02-23 The Art of Living for A Technological Age sketches the crisis of our late modern age where persons are enamored by the promises of progress and disciplined to form by the power of technology the ontology of our age Yet it also offers a response attending to those performative activities educative and transformative social practices that might allow us to live humanly and bear witness to human being becoming for a technological age As such it is an exemplary example of the goals and outcomes of the Dispatches series the individual volumes of which draw on diverse theological resources in order to offer urgent responses to contemporary crises Authors in the series introduce succinct and provocative arguments intended to provoke dialogue and exchange of ideas while setting in relief the implications of theology for political and moral life

Gerontechnology Gari Lesnoff-Caravaglia, 2007 Aging does not occur in isolation but is a reflection of societal attitudes and resulting practical outcomes Practical responses are

principally the purview of engineering technology and the biomedical sciences while the societal attitudes represent the ethical philosophical and social bases of the culture Together they provide the inevitable link between the fields of gerontology and technology Gerontechnology The six sections of this groundbreaking book Gerontechnology detail this relationship Part I describes the multi faceted convergence of technology and aging as well as the problems and challenges it presents Part II serves as an introduction to both gerontologists and engineers to the age related changes due to disease or senescence inherent in human aging and outlines potential areas of technological intervention Part III addresses the problems and processes of invention particularly ergonomics which lead to the development of technologies specifically designed for the enhancement of the lives of the older population while Part IV explores the range of sensory interventions currently available particularly in the areas of vision and hearing as well as describing those that hold greatest promise for future older populations Automation through the employment of robots and advanced forms of transportation is the focus of Part V The utilization of robots to increase the independence of older persons along with technological assistive mobility devices is given attention The closing section Part VI includes a discussion of information processing communication and the effects of the constant and continuing interplay between technology and aging This section also analyzes human experience from the perspective of the extraordinary framework for living provided by the growth of an aging population and the advanced technologies which have led to the conceptualization of Gerontechnology the herald of a new age for human exploration
