Aging Sensory Systems And Perception:

Aging Sensory Systems and Perception John F. Corso, 1981 *Experimental Psychology, Cognition, and Human Aging* Donald H. Kausler, 2012-12-06 This book is a major revision and extension of my earlier book *Experimental Psychology and Human Aging* which appeared in 1982. The intervening years have seen a remarkable expansion of psychological research on human aging, especially on topics dealing with cognition. They have also seen research on cognitive aging gain increasing importance within the mainstream of basic cognitive research. As my lecture notes for my course in the psychology of aging grew, so did my apprehension regarding the task ahead of me in revising the first edition. The research explosion in cognitive aging forced several major changes in content from the first to the second edition. Two chapters on learning and memory in the first edition were necessarily expanded to six chapters in the present edition. Similarly, the single prior chapter on perception and attention became two chapters, as did the single prior chapter on thinking. Another change from the first edition is the addition of some review of the effects of abnormal aging on various cognitive processes, particularly in regard to memory functioning. To keep the revision within reasonable length, some sacrifices had to be made. The multiple chapters on methodology and theory in the first edition were condensed into the present single chapter. However, the major topics from the first edition were retained and, in fact, added to by the inclusion of important topics and issues that emerged over the past eight years. Perspectives on Human Memory and Cognitive Aging Moshe Naveh-Benjamin, Morris Moscovitch, Henry L. Roediger, III, 2013-04-15 Divided into four parts, the first section of this book deals with levels of processing and memory theory; the second addresses working memory and attention; the third deals with cognitive aging; and the last addresses neuroscience perspectives. **Principles and Practice of Geriatric Psychiatry** Mohammed T. Abou-Saleh, Cornelius L. E. Katona, Anand Kumar, 2011-01-04 The renowned *Principles and Practice of Geriatric Psychiatry* now in its third edition addresses the social and biological concepts of geriatric mental health from an international perspective. Featuring contributions by distinguished authors from around the world, the book offers a distinctive angle on issues in this continually developing discipline. *Principles and Practice of Geriatric Psychiatry* provides a comprehensive review of geriatric psychiatry, spanning both psychiatric and non-psychiatric disorders, scientific advances in service development, specific clinical dilemmas. New chapters on genetics of aging, somatoform disorders, epidemiology of substance abuse, somatoform disorders, care of the dying patient. Continuing the practice of earlier editions, the major sections of the book address aging, diagnosis and assessment, and clinical conditions, incorporating an engaging discussion on substance abuse and schizophrenic disorders. Shorter sections include the presentation of mental illness in elderly people from different cultures, one of the most popular sections in previous editions. Learning and behavioural studies, as well as models of geriatric psychiatry practice, are covered extensively. This book provides a detailed overview of the entire range of mental illness in old age, presented within an accessible format. *Principles and Practice of Geriatric Psychiatry* is an essential read for psychiatrists.

geriatricians neurologists and psychologists It is of particular use for instructors of general psychiatry programs and their residents *Everyday Cognition in Adulthood and Late Life* Leonard W. Poon, David C. Rubin, Barbara A. Wilson, 1992-01-31 The authors present relevant data that open up new directions for those studying cognitive aging *MCI and Alzheimer's Dementia* Kathryn A. Bayles, Cheryl K. Tomoeda, 2013-07-01 **Age-related Changes in Auditory Perception** Leah Fostick, Bruce A. Schneider, 2022-09-19 **Impact of Technology on Successful Aging** K. Warner Schaie, PhD, Neil Charness, PhD, 2003-09-23 This volume provides a detailed examination of changes in technology that impact individuals as they age with an emphasis upon cultural contexts and person environment fit from human factors psychological and sociological perspectives The editors take into consideration the role of macro influences in shaping technological changes in industrialized societies that effect successful aging in terms of quality of life Topics discussed include human factors and aging the impact of the internet and assistive technology As a special feature each chapter is followed by two commentaries from experts in the same and neighboring disciplines Perception and Cognition: Interactions in the Aging Brain Harriet A. Allen, Katherine L. Roberts, 2016-09-13 Healthy ageing can lead to declines in both perceptual and cognitive functions Impaired perception such as that resulting from hearing loss or reduced visual or tactile resolution increases demands on higher level cognitive functions to cope or compensate It is possible for example to use focused attention to overcome perceptual limitations Unfortunately cognitive functions also decline in old age This can mean that perceptual impairments are exacerbated by cognitive decline and vice versa but also means that interventions aimed at one type of decline can lead to improvements in the other Just as improved cognition can ameliorate perceptual deficits improving the stimulus can help offset cognitive deficits For example making directions and routes easy to follow can help compensate for declines in navigation abilities In this Topic we bring together papers from both auditory and visual researchers that address the interaction between perception and cognition in the ageing brain Many of the studies demonstrate that a broadening of representations or increased reliance on gist underlie perceptual and cognitive age related declines There is also clear evidence that impaired perception is associated with poor cognition although encouragingly it can also be seen that good perception is associated with better cognition Compensatory cognitive strategies were less successful in improving perception than might be expected We also present papers which highlight important methodological considerations that are required when studying the older brain **The Elderly as Modern Pioneers** Philip Silverman, 1987 Overall one of the most competent and well presented treatments of the subject now available Jay Sokolovsky University of Maryland a valuable contribution to the field of gerontology The volume combines interdisciplinary and cross cultural perspectives written in a well organized framework without sacrificing depth and comprehensive summary of gerontological research Clinical Gerontologist A well written and documented volume for persons interested in the anthropological viewpoint on aging Choice the use of cross cultural comparisons provides a broadened perspective to understanding the issues of aging Current

Literature on Aging It is comprehensive well written mercifully jargon free critical and controversial and undogmatic Aging and Society This volume focuses on the nature and problems of old age providing a comprehensive summary of current gerontological research from interdisciplinary and cross cultural perspectives

Cognitive Neuroscience of Aging : Linking Cognitive and Cerebral Aging Roberto Cabeza Center for Cognitive Neuroscience Duke University, Lars Nyberg Department of Psychology Umea University, Denise Park Professor of Psychology University of Illinois at Urbana-Champaign, 2004-11-18 Until very recently our knowledge about the neural basis of cognitive aging was based on two disciplines that had very little contact with each other Whereas the neuroscience of aging investigated the effects of aging on the brain independently of age related changes in cognition the cognitive psychology of aging investigated the effects of aging on cognition independently of age related changes in the brain The lack of communication between these two disciplines is currently being addressed by an increasing number of studies that focus on

the relationships between cognitive aging and cerebral aging This rapidly growing body of research has come to constitute a new discipline which may be called cognitive neuroscience of aging The goal of Cognitive Neuroscience of Aging is to introduce the reader to this new discipline at a level that is useful to both professionals and students in the domains of cognitive neuroscience cognitive psychology neuroscience neuropsychology neurology and other related areas This book is divided into four main sections The first section describes noninvasive measures of cerebral aging including structural e g volumetric MRI chemical e g dopamine PET electrophysiological e g ERPs and hemodynamic e g fMRI and discusses how they can be linked to behavioral measures of cognitive aging The second section reviews evidence for the effects of aging on neural activity during different cognitive functions including perception and attention imagery working memory long term memory and prospective memory The third section focuses on clinical and applied topics such as the distinction between healthy aging and Alzheimers disease and the use of cognitive training to ameliorate age related cognitive decline The last section describes theories that relate cognitive and cerebral aging including models accounting for functional neuroimaging evidence and models supported by computer simulations Taken together the chapters in this volume provide the first unified and comprehensive overview of the new discipline of cognitive neuroscience of aging Handbook of Human Factors and Ergonomics Gavriel Salvendy, 2012-05-24 The fourth edition of the Handbook of Human Factors and Ergonomics has been completely revised and updated This includes all existing third edition chapters plus new chapters written to cover new areas These include the following subjects Managing low back disorder risk in the workplace Online interactivity Neuroergonomics Office ergonomics Social networking HF E in motor vehicle transportation User requirements Human factors and ergonomics in aviation Human factors in ambient intelligent environments As with the earlier editions the main purpose of this handbook is to serve the needs of the human factors and ergonomics researchers practitioners and graduate students Each chapter has a strong theory and scientific base but is heavily focused on real world applications As such a significant number of case studies examples figures and tables are included to aid in the understanding and application of the material covered
