Food Technology, 1969 Computer Applications in Food Technology R. Paul Singh, 1996-08-12
 The Institute of Food Technologists IFT recently endorsed the use of computers in food science education
 The minimum standards for degrees in food science as suggested by IFT require the students to use computers in the solution of problems
 the collection and analysis of data
 the control processes in addition to word processing
 Because they are widely used in business
 allow statistical and graphical of experimental data and can mimic laboratory experimentation
 spreadsheets provide an ideal tool for learning the important features of computers and programming
 In addition they are ideally suited for food science students who usually do not have an extensive mathematical background
 Drawing from the many courses he has taught at UC Davis
 Dr Singh covers the general basics of spreadsheets using examples specific to food science
 He includes more than 50 solved problems drawn from key areas of food science namely food microbiology
 food chemistry
 sensory evaluation
 statistical quality control and food engineering
 Each problem is presented with the required equations and detailed steps necessary for programming the spreadsheet
 Helpful hints in using the spreadsheets are also provided throughout the text

Key Features
 The first book to integrate spreadsheets in teaching food science and technology
 Includes more than 50 solved examples of spreadsheet use in food science and engineering
 Presents a step by step introduction to spreadsheet use
 Provides a food composition database on a computer disk
