Granum, Lars Qvortrup, B. Holmqvist, S. Kolstrup, K. Halskov Madsen, 2013-03-09 Lars Qvortrup The world of interactive 3D multimedia is a cross institutional world Here researchers from media studies linguistics dramaturgy media technology 3D modelling robotics computer science sociology etc etc meet In order not to create a new tower of Babel it is important to

develop a set of common concepts and references This is the aim of the first section of the book In Chapter 2 Jens F Jensen identifies the roots of interaction and interactivity in media studies literature studies and computer science and presents definitions of interaction as something going on among agents and agents and objects and of interactivity as a property of media supporting interaction Similarly he makes a classification of human users avatars autonomous agents and objects demonstrating that no universal differences can be made We are dealing with a continuum While Jensen approaches these categories from a semiotic point of view in Chapter 3 Peer Mylov discusses similar issues from a psychological point of view Seen from the user's perspective a basic difference is that between stage and back stage or rather front stage i e between the real I and we and the virtual representational I and we Focusing on the computer as a stage in Chapter 4 Kjølner and Lehmann use the theatre metaphor to conceptualize the stage phenomena and the relationship between stage and front stage
