Creation Of Technological Capability In Developing Countries:

The Creation of Technological Capability in Developing Countries John Lawrence Enos,1991 It is now widely accepted that technology is desirable indeed essential for growth and development within any economy However economists and planners have only recently started to consider the question of applying technology within developing countries

Technological Capabilities in Developing Countries Ruby Gonsen,2016-02-17 This book combines the concept of technological capabilities from the development literature with an explanation of the specifics of these capabilities in industrial areas affected by new biotechnology This provides a framework of analysis for the modern bioprocessing industry in Mexico The necessity to go beyond mastery of imported technologies for these industries is discussed More generally the absence of core scientific capabilities at the firm level and other country specific factors deter the potential for developing countries to catch up in biotechnology **Acquisition of Technological Capability in Small Firms in Developing Countries** H. Romijn,1998-11-18 An authoritative examination of how small firms in developing countries acquire technological capability the knowledge and skills required to operate technology effectively and to adapt it to local conditions It fills a gap in the established literature on technological capability which has neglected the small scale sector in spite of the important role it plays in employment generation The author develops a methodology for a quantitative assessment of the learning process using case material from the small scale capital goods sector in Pakistan s Punjab Province ***Technological Capabilities and Export Success in Asia*** Dieter Ernst,Tom Ganiatsos,Lynn Mytelka,2003-09-02 What accounts for export success A team of international contributors show that learning and capability formation are critical to sustain competitiveness Through a series of case studies of firms in the textile and garment and electronics industries of five Asian economies Korea Taiwan Thailand Indonesia and Vietnam *Technological Capabilities and Export Success in Asia* demonstrates that cheap labour combined with currency devaluation is no longer sufficient for export success

UN Millennium Development Library: Innovation UN Millennium Project,2013-06-17 The Millennium Development Goals adopted at the UN Millennium Summit in 2000 are the world s targets for dramatically reducing extreme poverty in its many dimensions by 2015 income poverty hunger disease exclusion lack of infrastructure and shelter while promoting gender equality education health and environmental sustainability These bold goals can be met in all parts of the world if nations follow through on their commitments to work together to meet them Achieving the Millennium Development Goals offers the prospect of a more secure just and prosperous world for all The UN Millennium Project was commissioned by United Nations Secretary General Kofi Annan to develop a practical plan of action to meet the Millennium Development Goals As an independent advisory body directed by Professor Jeffrey D Sachs the UN Millennium Project submitted its recommendations to the UN Secretary General in January 2005 The core of the UN Millennium Project s work has been carried out by 10 thematic Task Forces comprising more than 250 experts from around the world including scientists development practitioners parliamentarians

policymakers and representatives from civil society UN agencies the World Bank the IMF and the private sector This report argues that meeting the Millennium Development Goals will require a substantial reorientation of development policies to focus on key sources of economic growth particularly the use of scientific and technological knowledge and related institutional adjustments It outlines key areas for policy action including focusing on platform or generic technologies defining infrastructure services as a foundation for technology improving higher education in science and placing universities at the center of local development spurring entrepreneurial activities improving the policy environment and focusing on areas of under funded research for development

Exploiting Linkages for Building Technological Capabilities Mai Fujita, 2014-01-10 One of the key ingredients of success in building internationally competitive industries lies in amassing a sizeable pool of competent suppliers of parts components and accessories This monograph examines how in developing countries suppliers of mechanical components at the low end of the technological trajectory build up key capabilities over time The focus is on Vietnam s motorcycle industry which was rapidly transformed from a small highly protected market to the world s fourth largest motorcycle producer This rare success resulted from intense competition between leading Japanese motorcycle manufacturers and local Vietnamese assemblers of imported Chinese components both attempting to gain supremacy in the emerging market In particular the book analyzes how local Vietnamese suppliers of motorcycle components exploited participation in contrasting types of value chains developed by the two groups of leading manufacturing firms referred to here as Japanese and or Vietnamese Chinese chains for accumulating strategic know how On the basis of historical evidence and recent empirical data collected through repeated rounds of in depth fieldwork the analysis finds first those suppliers learning trajectories evolved over time resulting in a divergence in

learning performance extending across suppliers in later phases of industrial development In the later stage high performing suppliers amassed basic innovative expertise constituting the bedrock of this fast growing industry Second the analysis finds that the diverging performance can be explained by the combination of roles played by lead firms in inducing and facilitating supplier learning and those of suppliers in mobilizing their own sources of knowledge These conclusions not only provide dynamic insightful accounts of supplier learning in developing country contexts but also make key theoretical and methodological contributions to the research on value chain participation and supplier learning

Draining Development? Peter Reuter, 2012-02-10 A growing concern among those interested in economic development is the realization that hundreds of billions of dollars are illicitly flowing out of developing countries to tax havens and other financial centers in the developed world This volume assesses the dynamics of these flows much of which is from corruption and tax evasion What causes them what are their

consequences and how might they be controlled The chapters by authors from a variety of backgrounds including criminologists and practicing lawyers as well as economists examine many dimensions of the phenomenon For example one chapter examines the political economy of the issue to what extent is this the consequence of a more general failure of governance so that it is more a manifestation of government weakness or can it be identified with a few specific features Two other chapters examine major illegal markets drug trafficking and human smuggling to assess how they contribute to these flows Other chapters are concerned with the corporate role in the phenomenon particularly the possibility that transfer pricing in which firms set prices for international trade among wholly owned affiliates might play a major role in moving money illicitly *Development and Humanitarian Assistance FY 1973 Program Presentation to the Congress United States.* Agency for International Development,1973
