Location of Occupants

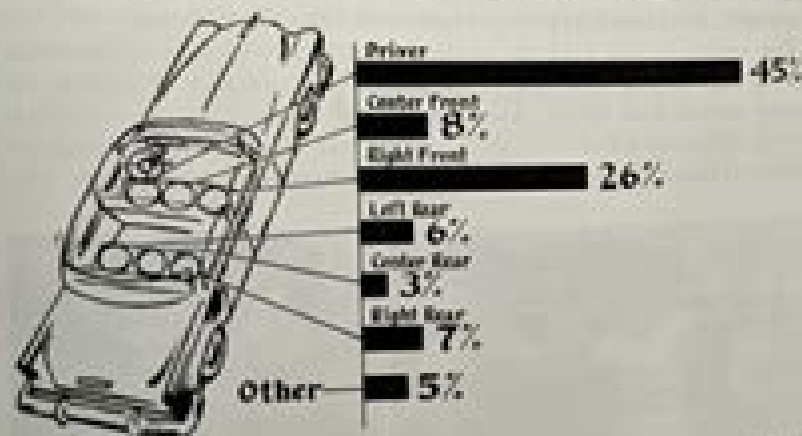

FIG. 18. Unusual seating, e.g., occupants of center section seats in station wagons, persons sitting on laps or holding persons on laps, standing or crouching, etc. (From collected automotive crash research data (Cornelli) reported in U. S. Government Printing Office Report, 1956, page 816, from hearings before a subcommittee investigating highway traffic accidents, Washington, D. C.)

Injury Potential of Seating Areas (For Non-ejected Persons)

% Injured :

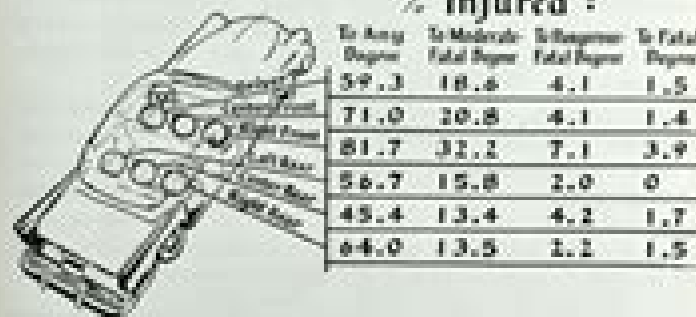

FIG. 19. Since the A.C.I.R. sample used here is one of injury-producing accidents a driver alone in a car must be injured to get into the sample. To eliminate this overemphasizing driver injury, this chart shows frequency of injury among drivers who were accompanied by passengers. (From the collected automotive crash injury research data (Cornelli) reported in the U. S. Government Printing Office, 1956, page 817, on hearings before a subcommittee investigating highway accidents, House of Representatives.)
