Creation And Double Chaos Science And Theology In Discussion:

Creation and Double Chaos Sjoerd Lieuwe Bonting, 2004-12-01 Scientist and theologian Sjoerd Bonting offers a new overarching framework for thinking about issues in religion and science. He looks at the creation controversy itself including biblical perspectives, traditional doctrines, and the particular potential contribution of chaos theory. Finally, Bonting extends this perspective: a combination of chaos theory and chaos theology he calls double chaos into a framework that addresses traditional questions about evil, divine agency, soteriology, the understanding of disease, possible extraterrestrial life, and the future.

Creation and Chaos Talk Eric M. Vail, 2012-06-07 Talk about chaos is pervasive. Biblical scholars, theologians, and scientists have been using the word chaos for some time, occasionally mingling ideas across disciplines around the shared word. Quite often, discussions of chaos center on the issues of creation's origin and nature as well as on God's creative methods and relationship to creation. Eric M. Vail investigates the current uses of the word chaos in those areas. A new way of articulating creation out of nothing is offered as both helpful and appropriate in our current milieu. He suggests where we ought to focus our use of the word chaos in Christian discourse and argues that chaos is more fitting for naming where creation has gone awry rather than for naming that state out of which creation comes to be.

Theology, Creation, and Environmental Ethics Whitney Bauman, 2009-04-30 Winner of the John Templeton Award for Theological Promise 2009. This book argues that the Christian doctrine of creatio ex nihilo sets up a support system for a logic of domination over others. It follows a genealogical method in examining how the concept of creation out of nothing materializes in the world throughout different periods in the history of the Christian West.

The ^ASeven Pillars of Creation William P. Brown, 2010-02-26 Brown embarks on an unprecedented tour of the various creation traditions of Scripture, seven total, in conversation with the natural sciences. The result is a groundbreaking work that recaptures the genuine awe that drives the best of scientific and theological inquiry, the wonder that unites the psalmist and the scientist.

The Music of Creation, with CD Arthur Robert Peacocke, Ann Pederson, 2006 Here Peacocke and Pederson compose a rhapsody on divine creativity in three movements. Through an extended analogy, they reveal how Christian understandings of creation can be brightly lit by scientific insights and approached analogously through examining musical creativity. They also include relevant selections on an accompanying CD-ROM. Composition, fugal arrangement, rhythm, and tempo jazz improvisation all shed light on creation. Creation from nothing, continual creation, incarnate creativity, communal or ecclesial creativity, open-ended future creativity, new ways of thinking about the Christian teaching are illumined and exemplified in musical creativity from Bach to Monk. Prelude, First Movement, Creation with Time, Second Movement, Creation in Time, Bridge Passage, Creation Fulfilled, Third Movement, Working at Creation, Coda, Ongoing Creation.

Building Cultures of Trust Martin E. Marty, 2010-08-17 In Building Cultures of Trust Martin Marty proposes ways to improve the conditions for trust at what might be called the grassroots level He suggests that it makes a difference if citizens put energy into inventing developing and encouraging cultures of trust in all areas of life families schools neighborhoods workplaces and churches Marty acknowledges that the reality of human nature tends toward trust breaking not trust building all the more reason he argues to develop strategies to bring about improvements incrementally one small step at a time from publisher description

Creation and Christ Angela Costley, 2020-11-09 The Epistle to the Hebrews is usually associated with its theology of Christ the High Priest However the term high priest is not so common in the first four chapters of Hebrews occurring only four times with a further reference to sacrifice in 1:3 Rather than emphasising the priestly or sacrificial activity of Christ these opening sections contain a number of references to creation 1:2-3 10:12-15 9:10-13 1:6-4:3-4 and 4:9-10 In this volume Angela Costley uses discourse analysis to explore the importance of the topic of creation to the discourse of the Epistle to the Hebrews uncovering a close link between creation and salvation She highlights the interaction of the topic of creation with the topic of salvation in the discourse to uncover a depiction of Christ as the creator who descends to take on human flesh God who becomes human in order to lead humanity heavenward

Cleansing the Cosmos E. Janet Warren, 2012-11-08 Understanding evil spiritual forces is essential for Christian theology yet discussion is almost always phrased in terms of spiritual warfare Warfare language is problematic being dualistic assigning a high degree of ontology to evil and poorly applicable to ministry This unique study proposes a biblically based model as the first alternative to a spiritual warfare framework for dealing with the

demonic thus providing insights for preaching counseling and missiology Warren develops this model using metaphor theory and examining four biblical themes Creation Cult Christ and Church Metaphors of cleansing ordering and boundary setting are developed in contrast to battle imagery and relevant theological issues are engaged Boyd's warfare imagery Barth's ideas of evil as nothingness and Eliade's notion of the sacred and the profane The role of the Holy Spirit is emphasized and the ontology of evil minimized This model incorporates concentric circles evil being considered peripheral to divine reality and provides a refreshing alternative to current spiritual warfare models

The Palgrave Handbook on the Problem of Animal Suffering in the Philosophy of Religion B. Kyle Keltz, 2025-07-28 Atheists argue that animal pain disease suffering and death cause a problem for theism because they believe that an all knowing all powerful and all good God would not use millions of years of animal suffering just to make a world suitable for humans Animal suffering was not a concern for theism through the medieval period but it has been increasingly discussed in philosophy of religion since modern times and there is especially a large and growing amount of literature on this subject that has been published in the last few decades This handbook serves as a guide for those interested in the literature on the problem by bringing together experts in the philosophy of religion theology environmental ethics and the philosophy of animal minds It not only presents major formulations of the problem of animal suffering and major theodicies but it also discusses metaethical issues regarding animal suffering the question of animal consciousness and self awareness and their implications for animal suffering and what implications available theodicies might have for animal ethics

A Place of Springs Grace M. Jantzen, 2009-12-16 In this book Grace Jantzen constructs a Quaker spirituality of beauty as a theological philosophical response to a world preoccupied with death and violence Having mapped the foundations of western cultural violence in the Greco Roman period and the Judea Christian tradition in *Foundations of Violence and Violence to Eternity* she now offers her alternative vision This vision is an original and creative feminist reading of the Quaker tradition considering George Fox and the writings of Quaker women exploring the themes of inner light and beauty as alternatives to violence and the obstacles to building such an alternative world After showing how seventeenth century Quakers offered a different option for modernity she maps the philosophical and ethical implications of engaging with the world through beauty and its transforming power Written for everyone interested in contemporary spirituality it explains how Quaker ideas can provide a way to transform our violent world into one that celebrates life rather than death peace rather than violence This work is the second of two posthumous publications to complete Grace M Jantzen's *Death and the Displacement of Beauty* collection which began with *Foundations of Violence* Routledge 2004

Braided Selves Pamela Cooper-White, 2011-06-10 What if we are more multiple as persons than traditional psychology has taught us to believe And what if our multiplicity is a part of how we are made in the very image of a loving relational multiple God How have modern Western notions of Oneness caused harm to both individuals and society And how can an appreciation of our multiplicity help liberate the voices of those who live at the margins both of society and within our own complex selves *Braided Selves* explores these questions from the perspectives of postmodern pastoral psychology and Trinitarian theology with implications for the practice of spiritual care counseling and psychotherapy This volume gathers ten years of essays on this theme by preeminent pastoral theologian Pamela Cooper White whose writings bring into dialogue postmodern feminist and psychoanalytic theory and constructive theology

Here For Our Children's Children? Adrian C. Armstrong, 2016-04-05 This study reviews the many different bases for wanting to preserve the environment By seeing how protagonists approach the same situation from different assumptions some of the origins of environmental conflict may be established and ways of resolving conflict can be identified There are two major issues in

environmental ethics The first asks whether the problems can be solved within current approaches or require instead lifestyle changes for the whole of western civilisation The second issue concerns why the environment should be valued This review identifies a series in increasingly stronger valuations that can be identified as 1 Hedonistic we protect the environment because we like it 2 Utilitarian the environment is valuable to us 3 Consequentialist we want to preserve things for other people now or future 4 Intrinsic The environment has virtue in its own right 5 Extrinsic we value the environment because it is of consequence to some thing else theistic a God Thirdly these insights are used to explore potential ways of resolving environmental conflicts notably by the recovery of democratic decision making at the right scale local national or even global
