**Birds of Ontario: Habitat Requirements, Limiting Factors, and Status** Al Sandilands, 2011-01-01 The vast literature on the history of birds is continually growing but rarely has this information been compiled so that it is readily available in one reference work Birds of Ontario is such a work providing a comprehensive summary of the life history requirements of bird species in the province In the first volume information on habitat limiting factors and status is presented for 84 species of nonpasserines that occur regularly in Ontario These topics are covered for the three primary avian seasons breeding migration and winter A wealth of information including habitat nest sites territoriality site fidelity annual reproductive effort habitat loss and degradation and environmental contaminants are covered in the species accounts The book is greatly enhanced by illustrations by Ross James Maps depicting breeding and wintering range are also presented for each species Birds of Ontario will be an essential reference for wildlife biologists environmental consultants and planners preparing or reviewing environmental impact statements and environmental assessments Serious birders will find it of interest as well Although the book focuses on Ontario birds it is highly relevant to adjacent provinces and states *National Union Catalog*, 1978 Includes entries for maps and atlases **New England Wildlife** Richard M. DeGraaf, Deborah D. Rudis, 1986

**Library of Congress Catalogs** Library of Congress, 1980 **Farmers' Bulletin** United States. Department of Agriculture, 1918 Corn is made mostly of soil moisture and warm air The acre yield of the United States has been below 31 bushels every year while moisture and warm air sufficient to bring the yield to 100 bushels have gone to waste By reducing the waste of moisture and heat corn yields can be doubled Moisture runs off and carries with it the most fertile parts of the soil Heat goes to waste in drying the soil and subsoil while timely cultivation would save both heat and moisture Cultivation sometimes is beneficial sometime injurious Page 18 Recent discovery of the fact that seed corn that matures well and dries out promptly will keep its good germinating and yielding powers for four or five years makes unnecessary planting of poor seed corn or the loss of acclimated and improved strains Page 23 This bulletin is especially applicable to dry land regions but corn yields are so dependent upon the relative quantities of soil moisture and heat that the principles given here apply wherever corn is raised p 2 **The Iowa Breeding Bird Atlas** Laura Spess Jackson, Carol A. Thompson, James J. Dinsmore, 1996 The Iowa Breeding Bird Atlas the first comprehensive statewide survey of Iowa s breeding birds provides a detailed record of the composition and distribution of the avifauna of the Hawkeye State The atlas documents the presence of 199 species 158 of which were confirmed breeding This landmark volume will alert Iowans to the limited distribution of numerous species and serve as a guide to the management practices such as forest and wetland management set aside programs reduction in farm chemical use and crop diversity which could help insure that many future changes are positive ones The Iowa Breeding Bird Atlas provides a welcome and much needed baseline for future comparisons of changes in Iowa s birdlife and by extension the lives of all animals in the state **Early Art of the Southeastern Indians** Susan C.

Power, 2004 *Early Art of the Southeastern Indians* is a visual journey through time highlighting some of the most skillfully created art in native North America. The remarkable objects described and pictured here, many in full color, reveal the hands of master artists who developed lapidary and weaving traditions, established centers for production of shell and copper objects, and created the first ceramics in North America. Presenting artifacts originating in the Archaic through the Mississippian periods from thousands of years ago through A.D. 1600, Susan C. Power introduces us to an extraordinary assortment of ceremonial and functional objects including pipes, vessels, figurines, and much more. Drawn from every corner of the Southeast from Louisiana to the Ohio River valley from Florida to Oklahoma, the pieces chronicle the emergence of new media and the mastery of new techniques as they offer clues to their creators, widening awareness of their physical and spiritual worlds. The most complex works, writes Power, were linked to male and sometimes female leaders. Wearing bold ensembles consisting of symbolic colors, sacred media, and richly complex designs, the leaders controlled large ceremonial centers that were noteworthy in regional art history, such as Etowah, Georgia; Spiro, Oklahoma; Cahokia, Illinois; and Moundville, Alabama. Many objects were used locally; others circulated to distant locales. Power comments on the widening of artists' subjects, starting with animals and insects, moving to humans, then culminating in supernatural combinations of both. She discusses how a piece's artistic language could function as a visual shorthand in local style and expression yet embody an iconography of regional proportions. The remarkable achievements of these southeastern artists delight the senses and engage the mind while giving a brief glimpse into the rich symbolic world of feathered serpents and winged beings.

The Naturalists' Leisure Hour and Monthly Bulletin, 1892      **Monographic Series** Library of Congress, 1979      Powerful Pictures: Rock Art Research Histories around the World Jamie Hampson, Sam Challis, Joakim Goldhahn, 2022-12-29 Focusing on stunning paintings and engravings from around the world, 16 papers interrogate the driving forces behind global rock art research. Many of the motifs featured were created by indigenous hunter-gatherer groups; this book sheds new light on non-Western rituals and worldviews, many of which are threatened or on the point of extinction.

**Bulletin** United States National Museum, 1919      Books in Print, 1994      **Peanut Oil** Homer Columbus Thompson, Herbert Stevens Bailey, 1918      **The Birds of Ohio** Bruce G. Peterjohn, 1989. *The Birds of Ohio* and *The Birds of Illinois* are both magnificently illustrated by William Zimmerman. Wildfowl of North America: Zimmermann's work has frequently been compared to Audubon's. But in place of Audubon's romanticism, Zimmerman offers greater technical skill; his comfortable birds appear to be on the verge of taking wing from the page. These are splendid works: fine paintings and an authoritative text. They hold the promise of attaining collector status and value. Every collection with a birding interest should acquire immediately. A pre-publication price of \$49.95 is offered through 1989. Annotation copyrighted by Book News, Inc.
