Australian High Country Raptors Jerry

Olsen, 2014-06-18 *Australian High Country Raptors* covers raptor species that regularly breed in the high country above 600 metres from Goulburn in New South Wales down to the hills outside Melbourne Victoria. Author Jerry Olsen explores the nature of these striking animals that are classified as Accipitriformes: diurnal hawks, falcons, kites and eagles; Falconiformes and Strigiformes: nocturnal owls. Comparisons between these high country raptors and lower elevation breeders are also provided, in addition to comparisons with raptors found overseas, especially from North America and Europe. The book begins with a description of habitats and vegetation types in the high country and which raptors are likely to be seen in each habitat type. It continues with sections on finding and watching raptors, raptor identification, hunting styles, food, breeding and behaviour, and conservation. Appendices provide species accounts for diurnal breeding species in the high country with basic information about their ecology, distribution and conservation, as well as detailed instructions about handling an injured or orphaned raptor. Illustrated throughout with photographs and drawings, *Australian High Country Raptors* offers readers a chance to look into the lives of Australia's fascinating birds of prey.

Australian High Country Owls Jerry Olsen, 2011-11-15 *Australian High Country Owls* provides the latest scientific information on Australian owl species, especially Ninox owls. It details studies of Southern Boobooks and Powerful Owls, visits to North America and Europe to learn about owl research and the resulting publications that overturned some existing beliefs about Australian owls. Ultimately, this led to the discovery of a new owl species in Indonesia, the Little Sumba Hawk Owl. Appendices cover the biology, conservation and rehabilitation of Australian owls, including field recognition, subspecies, taxonomy, habitat, behaviour, food, range, migration, breeding, voice and calls, status and myths, questions about each species and techniques for caring for injured and orphaned owls. The book includes numerous photographs of different owl species and will be a handy reference for bird researchers and amateur bird watchers alike. 2012 Whitley Award Commendation for Vertebrate Natural History.

Birds of Prey of Australia Stephen Debus, 2019-07-01 Raptors are popular and iconic birds and are important ecologically, with some species listed as threatened. Yet they are among the most difficult birds to identify. This fully updated Third Edition of the popular and award-winning field guide *Birds of Prey of Australia* contains two sections: a field guide with distribution maps, detailed illustrations and information on identification, and a handbook which includes an overview of the current knowledge about raptors, including their biology, ecology and behaviour. An illustrated section on difficult-to-distinguish species pairs is also included, along with new photographs. *Birds of Prey of Australia* will appeal to a wide range of readers, including ornithologists, raptor biologists, birdwatchers, wildlife rescuers, carers, raptor rehabilitators, zookeepers, naturalists, bushwalkers, ecological consultants, fauna authorities, park rangers, state forestry personnel and students.

The Quintessential Bird Viola Temple Watts, 2011 Betty Temple Watts 1901-1992 developed an interest in birds in her early married life while living in Iran and Papua New Guinea.

Although she had studied art formally as a nineteen year old it was not until she was 48 and settled in Melbourne that she decided to immerse herself in her bird art Betty spent much of her time practising drawing but was constantly critical of the results In spite of her harsh selfjudgement others had a high opinion of her skill and in 1952 she received her first commission going on to provide bird illustrations for numerous publications until she was in her late eighties The Quintessential Bird allows readers a glimpse into Betty s joyous world of birds This is followed by the plates reproduced in full along with 60 close ups of individual birds

Australian Predators of the Sky Penny Olsen,2015-09-01 Australian predators of the sky are some of the most admired and the most despised of the bird world Raptors are admired for their strength and independence but despised for their depredations on livestock and favourite garden birds while the owls are at once respected for their wisdom and watchfulness and feared for their mournful cries and association with darkness and ill omen The book begins with fascinating descriptions by award winning natural history author Penny Olsen on the discovery and illustration of birds of prey in Australia and their characteristics and ecology followed by full colour illustrations of each species by a variety of artists accompanied by intriguing notes about the birds Australian Predators of the Sky comprises over 200 striking paintings lithographs and engravings of all 34 Australian species 25 diurnal birds of prey such as eagles hawks and falcons and nine owls such as hawk owls and barn owls

The Action Plan for Australian Birds 2020 Stephen T. Garnett,G Barry Baker,2021-12 The Action Plan for Australian Birds 2020 is the most comprehensive review of the status of Australia s avifauna ever attempted The latest in a series of action plans for Australian birds that have been produced every decade since 1992 it is also the largest The accounts in this plan have been authored by more than 300 of the most knowledgeable bird experts in the country and feature far more detail than any of the earlier plans This volume also includes accounts of over 60 taxa that are no longer considered threatened mainly thanks to sustained conservation action over many decades This extensive book covers key themes that have emerged in the last decade including the increasing impact of climate change as a threatening process most obviously in Queensland s tropical rainforests where many birds are being pushed up the mountains However the effects are also indirect as happened in the catastrophic fires of 2019 20 Many of the newly listed birds are subspecies confined to Kangaroo Island where fire destroyed over half the population But there are good news stories too especially on islands where there have been spectacular successes with predator control Such uplifting results

demonstrate that when action plans are followed by action on the ground threatened species can indeed be recovered and threats alleviated *Flocks of Colour* Penny Olsen,2013-10-01 What name could be a more apt description of Australia than The Land of Parrots a name inspired by late sixteenth century maps showing a southern region labelled Psittacorum regio This beautiful book takes a close look at parrots in Australia from the first published illustration of an Australian parrot a Rainbow Lorikeet collected live on Cook s 1770 voyage to William T Cooper s twentieth century watercolour of the elusive Night Parrot With introductory essays by ornithologist Penny Olsen *Flocks of Colour* covers two and a quarter centuries of discovery and illustration of Australia s avifauna It features a rich portfolio of images of all the Australian parrots by various artists including John Gould Edward Lear Neville W Cayley and William T Cooper selected from the collections of the National Library of Australia The foreword is by Joseph Forshaw a world expert on the parrot family *Applied Population and Community Ecology* Jim Hone,2012-06-20 Part of the Zoological Society of London s Conservation Science and Practice Series *Applied Population and Community Ecology* evaluates theory in population and community ecology using a case study of feral pigs birds and plants in the high country of south eastern Australia In sequence the book reviews the relevant theory and uses long term research over a quarter of a century on the population ecology of feral pigs and then community ecology of birds and plants to evaluate the theory The book brings together into one volume research results of many observational experimental and modelling studies and directly compares them with those from related studies around the world The implications of the results for future wildlife management are also discussed Intended readers are ecologists graduate students in ecology and wildlife management and conservation and pest managers **Too Many Bird Books** Geoffrey Dabb,2023-08-01 This is a chronicle of encounters with a lot of bird books in fact a lifetime of such encounters The world of bird books is vast and varied defying coherent descriptions The author s qualification for making this attempt to describe it is that he owns several hundred of them gathered over more than 70 years To help make sense of this obsession the description of the books is linked to life in which traditional birdwatching and book hunting went on in different places and in between other things *Feather and Brush* Penny Olsen,2022-05-02 *Feather and Brush* traces the history of bird art in Australia from the simple engravings illustrating accounts of the earliest European voyages of discovery to the diversity of artwork available today It explores the early European approach in which naval draughtsmen officers convicts settlers naturalists artists and scientists alike contributed both to the art and the science of ornithology through to a wealth of contemporary artists who feature birds in their works This book contains more than 400 images representing the work of 158 artists some well known others published for the first time The illustrations have been selected for their interest whether ornithological historical or artistic They range from classical to quirky decorative to functional monumental to intimate Together they demonstrate the rich history of Australian bird art as it evolved in Europe and Australia and continues today along with the trends and technologies of the times This second edition includes new and revised chapters and features about 200 new
