## **Birds Of Southeastern Washington:**

*Birds of Southeastern Washington* John W. Weber, Earl Junior Larrison, 1977      **Breeding Birds of Washington State** Michael Roger Smith, Philip Ward Mattocks, Kelly Michela Cassidy, 1997      Marine Birds of the Southeastern United States and Gulf of Mexico: Anseriformes, 1982      **Marine Birds of the Southeastern United States and Gulf of Mexico: Charadriiformes** Roger B. Clapp, 1982      Birds of Washington Terence R. Wahl, 2005

*Birds of Washington* is the first complete reference work on Washington's birds to be published in more than fifty years. Designed to enrich the popular study of Washington birds, this comprehensive volume includes individual accounts of the 483 species recorded in the state. *Birds of Washington* is not a field guide for identifying birds. Instead, it compiles and presents in a single volume current information about the population status and distribution of each species, as well as their habitat preferences, their seasonal activities, apparent trends and changes in occurrence or abundance, the occurrence of subspecies, and any management or conservation issues. Seasonal distribution maps are included for many selected species. More than forty contributing authors volunteered their time and expertise to create these authoritative accounts, which draw on a wide range of sources including scientific journals, wildlife agency reports, field observations, and surveys such as Christmas Bird Counts and Breeding Bird Surveys. While establishing a benchmark for future studies, *Birds of Washington* provides an indispensable source of information on avian life in the state for a broad audience of birders, wildlife biologists, land managers, conservationists, hunters, and wildlife enthusiasts in general.

**BOOK JACKET**      *Washington Birds, Their Locations and Identification* Earl Junior Larrison, Klaus G. Sonnenberg, 1968. The nests and eggs of all the common birds found west of the Mississippi are covered in detail. 520 species in all. More than 400 photographs show the nests and eggs in their typical habitats. Descriptive text includes color, shape, and number of eggs for each species, plus information on nesting materials, construction, and dimensions.
