Parliament. House of Commons. Treasury Committee, 2014 One of the most significant consequences of Co op Bank s near collapse from a public policy perspective was the collapse of Lloyds Banking Group s planned divestment under Project Verde Co op Bank s withdrawal forced Lloyds to resort to its fallback option of an Initial Public Offering The result is a new bank TSB which not having an existing banking presence of its own consists solely of the business divested by Lloyds Accordingly it has a personal current

account market share not of 7 per cent but of 4.2 per cent. There is a risk that a bank of this size might struggle to grow significantly and to act as a true challenger in the market. Had Co-op Bank's resulting capital shortfall been uncovered earlier, it is likely that the bank would not have progressed so far with Verde. As it was, the rapid and late emergence of the capital problem led to Co-op's withdrawal from the Verde process at a relatively late stage. The Committee recommends that the FRC investigation and the independent inquiry into the events at Co-op Bank consider the role of KPMG and the FSA in relation to the late emergence of loan impairment and IT losses. On the basis of these findings, the independent inquiry into the events at Co-op Bank should also form a view on whether Co-op's Verde bid could or should have been halted sooner. While it may not have been fully transparent from the start that Co-op Bank's bid was doomed to failure, it was beset by problems from an early stage. But it was not these problems that killed the deal; it was the capital shortfall that emerged only late in the day. It is important from every angle to determine why the capital shortfall was not uncovered earlier.
