Harrison, Faye V. Harrison, Faye Venetia Harrison, 1999 This pathbreaking collection of intellectual biographies is the first to probe the careers of thirteen early African American anthropologists detailing both their achievements and their struggle with the latent and sometimes blatant racism of the times Invaluable to historians of anthropology this collection will also be useful to readers interested in African American studies and biography The lives and work of Caroline Bond Day Zora Neale Hurston Louis Eugene King Laurence Foster W Montague Cobb Katherine Dunham Ellen Irene Diggs Allison Davis St Clair Drake Arthur Huff Fauset William S Willis Jr Hubert Barnes Ross Elliot Skinner **The Darwinian Tradition in Context** Richard G. Delisle, 2017-12-29 The main goal of this book is to put the Darwinian tradition in context by raising questions such as How should it be defined Did it interact with other research programs Were there any research programs that developed largely independently of the Darwinian tradition Accordingly the contributing authors explicitly explore the nature of the relationship between the Darwinian tradition and other research programs running in parallel In the wake of the Synthetic Theory of Evolution which was established throughout the 1930s 1940s and 1950s historians and philosophers of biology devoted considerable attention to the Darwinian tradition i e linking Charles Darwin to mid Twentieth Century developments in evolutionary biology Since then more recent developments in evolutionary biology have challenged in part or entirely the heritage of the Darwinian tradition Not surprisingly this has in turn been followed by a historiographical recalibration on the part of historians and philosophers regarding other research programs and traditions in evolutionary

biology In order to acknowledge this shift the papers in this book have been arranged on the basis of two main threads Part I A perspective that views Darwinism as either being originally pluralistic or having acquired such a pluralistic nature through modifications and borrowings over time Part II A perspective blurring the boundaries between non Darwinian and Darwinian traditions either by contending that Darwinism itself was never quite as Darwinian as previously assumed or that non Darwinian traditions took on board various Darwinian components when not fertilizing Darwinism directly Between a Darwinism reaching out to other research programs and non Darwinian programs reaching out to Darwinism the least that can be said is that this interweaving of intellectual threads blurs the historiographical field This volume aims to open vital new avenues for approaching and reflecting on the development of evolutionary biology *Changing the Face of Engineering* John Brooks Slaughter, Yu Tao, Willie Pearson Jr., 2015-12-15 How can academic institutions corporations and policymakers foster African American participation and advancement in engineering For much of America s history African Americans were discouraged or aggressively prevented from becoming scientists and engineers Those who did enter STEM fields found that their inventions and discoveries were often neither recognized nor valued Even today particularly in the field of engineering the participation of African American men and women is shockingly low and some evidence indicates that the situation might be getting worse In *Changing the Face of Engineering* twenty four eminent scholars address the underrepresentation of African Americans in engineering from a wide variety of disciplinary and professional perspectives while proposing workable classroom solutions and public policy initiatives They combine robust statistical analyses with personal narratives of African American engineers and STEM instructors who by taking evidenced based approaches have found success in graduating African American engineers *Changing the Face of Engineering* argues that the continued underrepresentation of African Americans in engineering impairs the ability of the United States to compete successfully in the global marketplace This volume will be of interest to STEM scholars and students as well as policymakers corporations and higher education institutions *Fifty Years of Women in Mathematics* Janet L.
