Handbook of Bird Biology Irby J. Lovette, John W. Fitzpatrick, 2016-09-19 Selected by Forbes.com as one of the 12 best books about birds and birding in 2016 This much anticipated third edition of the Handbook of Bird Biology is an essential and comprehensive resource for everyone interested in learning more about birds from casual bird watchers to formal students of ornithology Wherever you study birds your enjoyment will be enhanced by a better understanding of the incredible diversity of avian lifestyles Arising from the renowned Cornell Lab of Ornithology and authored by a team of experts from around the world the Handbook covers all aspects of avian diversity behaviour ecology evolution physiology and conservation Using examples drawn from birds found in every corner of the globe it explores and distills the many scientific discoveries that have made birds one of our best known and best loved parts of the natural world This edition has been completely revised and is presented with more than 800 full color images It provides readers with a tool for life long learning about birds and is suitable for bird watchers and ornithology students as well as for ecologists conservationists and resource managers who work with birds The Handbook of Bird Biology is the companion volume to the Cornell Lab's renowned distance learning course www.birds.cornell.edu/courses/home_homestudy

The Inner Bird Gary W. Kaiser, 2010-10-01 Birds are among the most successful vertebrates on Earth An important part of our natural environment and deeply embedded in our culture birds are studied by more professional ornithologists and enjoyed by more amateur enthusiasts than ever before However both amateurs and professionals typically focus on birds behaviour and appearance and only superficially understand the characteristics that make birds so unique The Inner Bird introduces readers to the avian skeleton then moves beyond anatomy to discuss the relationships between birds and dinosaurs and other early ancestors Gary Kaiser examines the challenges scientists face in understanding avian evolution even recent advances in biomolecular genetics have failed to provide a clear evolutionary story Using examples from recently discovered fossils of birds and near birds Kaiser describes an avian history based on the gradual abandonment of dinosaur like characteristics and the related acquisition of avian characteristics such as sophisticated flight techniques and the production of large eggs Such developments have enabled modern birds to invade the oceans and to exploit habitats that excluded dinosaurs for millions of years While ornithology is a complex discipline that draws on many fields it is nevertheless burdened with obsolete assumptions and archaic terminology The Inner Bird offers modern interpretations for some of those ideas and links them to more current research It should help anyone interested in birds to bridge the gap between long dead fossils and the challenges faced by living species

Stopover Ecology of Landbirds Migrating Along the Middle Rio Grande in Spring and

Fall Wang Yong,2002 **Principles of Thermal Ecology** Andrew Clarke,2017 This is the first single volume to cover the effect of temperature in its entirety The threat of rapid climatic change on a global scale is a stark reminder of the challenges that remain for evolutionary thermal biologists and adds a sense of urgency to this book s mission *Poultry Production in Hot Climates* N. J. Dagher,2008 This book gives an overview of the poultry industry in the warm regions of the world and covers research on breeding for heat resistance And highlights some of the findings on nutrient requirements of chickens and turkeys *Current Ornithology* Val Nolan Jr.,Ellen D. Ketterson,Charles F. Thompson,2013-11-11 Our purposes in this preface are first to reiterate our view of Current Ornithology s role second to describe briefly the contents of this vol ume and third to acknowledge the generous help of our Editorial Board and of the reviewers we have consulted about the contents of Volumes 13 and 14 As far as we know Current Ornithology is the only English lan guage publication currently devoted exclusively to extensive reviews and syntheses of topics pertaining to all aspects of the biology of birds Its chapters deal with subjects falling under such diverse rubrics as ecology evolution behavior phylogeny behavioral ecology anatomy and physiology and conservation biology but all focus primarily on birds Its authors whether members of the National Academy or young investigators just beginning their careers are leading authorities on their subjects and its referees are selected for their knowledge and expertise in the topics covered by the chapters they are asked to review **Toxicological Profile for DDT/DDD/DDE (Update)** Obaid Faroon,2010-08 DDT is a pesticide that was once widely used to control insects Both DDD and DDE are breakdown products of DDT This profile includes 1 The examination summary and interpretation of available toxicologic info and epidemiologic evaluations on DDT DDD DDE to ascertain the levels of significant human exposure for the substance and the associated chronic health effects 2 A determination of whether adequate info on the health effects of DDT DDD DDE is available to determine levels of exposure that present a significant risk to human health of chronic health effects and 3 Identification of toxicologic testing needed to identify the types or levels of exposure that may present significant risk of adverse health effects in humans Illus **Comparative Physiology of Fasting, Starvation, and Food Limitation** Marshall D. McCue,2012-05-17 All animals face the possibility of food limitation and ultimately starvation induced mortality This book summarizes state of the art of starvation biology from the ecological causes of food limitation to the physiological and evolutionary consequences of prolonged fasting It is written for an audience with an understanding of general principles in animal physiology yet offers a level of analysis and interpretation that will engage seasoned scientists Each chapter is written by active researchers in the field of comparative physiology and draws on the primary literature of starvation both in nature and the laboratory The chapters are organized among broad taxonomic categories such as protists arthropods fishes reptiles birds and flying aquatic and terrestrial mammals including humans particularly well studied animal models e g endotherms are further organized by experimental approaches such as analyses of blood metabolites stable isotopes thermobiology and modeling of body composition **Designing Low Carbon Societies in Landscapes** Nobukazu

Nakagoshi, Jhonamie A. Mabuhay, 2014-05-09 This book focuses on three major means of achieving a low carbon society conservation of the ecosystem complex changes of arrangement of landscapes and creation of biodiversity There are specific countermeasures to be taken for carbon absorption in the three types of landscapes urban cultural and natural because their carbon balances differ Urban landscapes are promising sites because they have the potential for greening and the creation of biodiversity Cultural landscapes in the tropics had not been actively researched until recently but this book now presents a collection of several cases focused on those areas Natural landscapes had existed in abundance in developing countries later nature protection areas were designated to coexist with development Now however developmental pressure has penetrated into those nature protection areas and landscape ecological projects are urgently required to preserve them As a result of global warming abnormal weather phenomena including super typhoons have occurred frequently in recent years The major underlying cause is the higher concentration of greenhouse gases released by human activities As well major natural absorbers of CO₂ such as forests wetlands and coral reefs are shrinking and the human impact is causing the ecological balance to deteriorate Controlling CO₂ emissions and expanding the CO₂ absorbers are keys to reducing total CO₂ Low carbon societies can be established by maintaining the original CO₂ balance through integration of multiple tools with contributions from diverse fields such as physics and chemistry physiology and humanities and education On the basis of an international consensus the environment must be protected no matter what sacrifices are required As this book demonstrates achieving a low carbon society is a top priority and landscape conservation is the first step in ecological research toward that goal
