The Birds of London Andrew Self, 2014-04-24 The first comprehensive avifauna for the London area ever published covering the status distribution and history of every species on the regional list in rich detail ***Birds in London*** W. Hudson, 2018-02-10 The opening chapter contains by way of introduction all that need be said concerning the object and scope of this work it remains to say here that as my aim has been to furnish an account of the London wild bird life of to day there was little help to be had from the writings of previous observers These mostly deal with the central parks and are interesting now mainly as showing the changes that have taken place At the end of the volume a list will be found of the papers and books on the subject which are known to me This list will strike many readers as an exceedingly meagre one when it is remembered that London has always been a home of ornithologists that from the days of Oliver Goldsmith who wrote pleasantly of the Temple Gardens rookery and of Thomas Pennant and his friend Daines Barrington there have never been wanting observers of the wild bird life within our gates The fact remains that with the exception of a few incidental passages to be found in various ornithological works nothing was expressly written about the birds of London until James Jennings s *Ornithologia* saw the light a little over seventy years ago Jennings s work was a poem probably the worst ever written in the English language but as he inserted copious notes fortunately in prose embodying his own observations on the bird life of east and south east London the book has a very considerable interest for us to day Nothing more of importance appeared until the late Shirley Hibberd s lively paper on London Birds in 1865 From that date onward the subject has attracted an increased attention and at present we have a number of London or park naturalists as they might be called who view the resident London species as adapted to an urban life and who chronicle their observations in the *Field Nature* *Zoologist* *Nature Notes* and other natural history journals and in the newspapers and magazines *Birdwatching London* David Darrell-Lambert, 2018-05 *The Birds of the London Area Since 1900* London Natural History Society, 1957 **The Birds Of London** H Kirke (Harry Kirke) 1871-1 Swann, 2025-05-22 *The Birds Of London* by H Kirke Swann offers a fascinating glimpse into the avian life of late 19th century London This detailed study provides descriptions of the various bird species found in the city their habitats and behaviors Written by a prominent ornithologist the book combines scientific observation with an accessible style making it a valuable resource for both amateur birdwatchers and seasoned naturalists This edition preserves the original text and illustrations offering readers a window into the natural history of London during a

period of significant urban development and environmental change Discover the enduring charm of London's birdlife through Swann's meticulous documentation capturing a moment in time when nature and urban life coexisted in unique ways This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it This work was reproduced from the original artifact and remains as true to the original work as possible Therefore you will see the original copyright references library stamps as most of these works have been housed in our most important libraries around the world and other notations in the work This work is in the public domain in the United States of America and possibly other nations Within the United States you may freely copy and distribute this work as no entity individual or corporate has a copyright on the body of the work As a reproduction of a historical artifact this work may contain missing or blurred pages poor pictures errant marks etc Scholars believe and we concur that this work is important enough to be preserved reproduced and made generally available to the public We appreciate your support of the preservation process and thank you for being an important part of keeping this knowledge alive and relevant [The Birds of London \(Classic Reprint\)](#) H. K. Swann, 2018-02-08 Excerpt from The Birds of London A few words upon the various localities mentioned in the following pages may perhaps not be out of place here especially as such a small proportion of Londoners are at all well acquainted with the said localities and even those that are will probably pardon me this slight digression To begin then in the east the farthest point mentioned is Dagenham Lake This is situated some four miles beyond Barking and on the north side of the Thames with which it was until recently connected It is a deep and clear sheet of water and is fully a mile in length by perhaps one sixth of a mile in breadth at the widest part The edge of the water is fringed with dense beds of reeds and sedges forming a cover for water fowl which however are not abundant owing no doubt to the lake being so much frequented by fishermen and gunners Nevertheless in the early morning particularly in the latter part of the year a few wild ducks of several species may be seen while the wary and artful moor hen is always about In the beds of reeds viii
