Birds Of The World In Color:

Birds of the World in Color Hans Hvass, 1964 **Birds of the World** Hans Hvass, 1975 *Birds of Tropical America* Steven Hilty, 2010-07-05

The guide to neotropical bird behavior that picks up where field guides leave off Why are tropical birds like parrots and quetzals so much more colorful than those in more temperate climates How can a vulture soaring thousands of feet above the canopy spot a dead rodent no bigger than a mouse on the rainforest floor What permits sparrow sized antbirds to not only survive but to thrive among relentless hordes of army ants that devour every other living thing in their path Steven Hilty has led birding tours to the American Tropics for decades By providing answers to the hundreds of questions asked by participants of these expeditions Hilty has produced a natural history of the bird life of the New World Tropics that is at once practical accurate and as endlessly fascinating as the species whose lives it reveals *Birds of Tropical America* was published by Chapters Publishing in 1994 and went out of print in 1997 UT Press is pleased to reissue it with a new epilogue and updated references
