Bibliography of Natural History Travel Narratives Anne S. Troelstra, 2017-06-01 Anne Troelstra's fine bibliography is an outstanding and ground breaking work He has provided the academic world with a long needed bibliographical record of human endeavour in the field of the natural sciences The travel narratives listed here encompass all aspects of the natural world in every part of the globe but are especially concerned with its fauna flora and fossil remains Such eyewitness accounts have always fascinated their readers but they were never written solely for entertainment fragmentary though they often are these narratives of travel and exploration are of immense importance for our scientific understanding of life on earth providing us with a window on an ever changing and often vanishing natural world Without such records of the past we could not track document or understand the significance of changes that are so important for the study of zoogeography With this book Troelstra gives us a superb overview of natural history travel narratives The well over four thousand detailed entries ranging over four centuries and all major western European languages are drawn from a wide range of sources and include both printed books and periodical contributions While no subject bibliography by a single author can attain absolute completeness Troelstra's work is comprehensive to a truly remarkable degree The entries are arranged alphabetically by author and chronologically by the year of first publication under the author's name A brief biography with the scope and range of their work is given for each author every title is set in context the contents including illustrations are described and all known editions and translations are cited In addition there is a geographical index that cross refers between authors and the regions visited and a full list of the bibliographical and biographical sources used in compiling the bibliography **Birds of**

Ethiopia and Eritrea John Ash, John Atkins, 2010-06-30 This groundbreaking book fills a large hole in the literature for one of the most diverse and least known areas of Africa Ethiopia and Eritrea have a fascinating and unique avifauna Poorly known in comparison to many parts of Africa knowledge on bird distribution in the two countries is scattered throughout the literature For more than 35 years the authors have been painstakingly collecting bird records in the region and plotting them on half degree maps including published records data from museum specimens sightings from their own extensive travels and more recently records from the many birdwatchers that now visit Ethiopia The resulting atlas provides for the first time an accurate assessment of the distribution of each of the 870 species known from the two countries including valuable information on breeding The succinct text summarises the results and discusses distribution to subspecies level Extensive introductory chapters cover topics such as topography geology vegetation climate habitats conservation migration breeding seasons bird ringing and the history of ornithology in the region *Monthly Catalogue, United States Public Documents*, 1995
