Management of Amphibians, Reptiles, and Small Mammals in North America Robert C. Szaro,Kieth E. Severson,David R. Patton,1988 Historically the management of public lands from a multiple use perspective has led to a system that emphasizes those habitat components or faunal elements that primarily resulted in some sort of definable economic value While this often benefitted other species that were not even considered in the original prescriptions it also negatively impacted others We no longer can afford to take this simplistic view of ecosystem management We need to use a more holistic approach where ecological landscapes are considered as units and land management practices incorporate all elements into an integrated policy This includes examining the impacts of proposed land uses on amphibian reptile and small mammal populations *Vertebrate Paleontology in Utah* David D. Gillette,1999 The 52 papers in this vary in content from summaries or state of knowledge treatments to detailed contributions that describe new species Although the distinction is subtle the title *Vertebrate Paleontology in Utah* indicates the science of paleontology in the state of Utah rather than the even more ambitious intent if it were given the title *Vertebrate Paleontology of Utah* which would promise an encyclopedic treatment of the subject The science of vertebrate paleontology in Utah is robust and intense It has grown prodigiously in the past decade and promises to continue to grow indefinitely This research benefits everyone in the state through Utah s muse ums and educational institutions which are the direct beneficiaries I-15 Corridor Utah County to Salt Lake County, Utah and Salt Lake Counties ,2008 *Pony Express Resource(s) Management Plan (RMP)* ,1988 **Utah BLM Statewide Wilderness Draft EIS** ,1990 Utah BLM Statewide Wilderness Environmental Impact Statement: West-Central Region United States.
