partner's viewpoint focusing on the formation and development of East West business relationships specifically during the transition period. Most chapters in *East West Business Relationships* apply a qualitative approach using case study methods. This methodology is unique in the present context of East West business as it allows an examination of the whole management process of the formation and development of business relationships providing a rich in depth analysis of the why's and how's of these relationships. It suggests that more understanding of the experiences, perceptions and attitudes of East European firms must be gained in order to diminish the problems, a huge number of which are simply a result of the misunderstanding of the Eastern counterpart faced by Western firms in Eastern Europe. This volume serves as a superior reference for academics and business managers interested in advancing their understanding of East West business relations.
