Preventing HIV in Developing Countries Laura Gibney, Ralph J. DiClemente, Sten H. Vermund, 2006-04-11 Globally action to prevent HIV spread is inadequate Over 16 000 new infections occur every day Yet we are not helpless in the face of disaster as shown by the rich prevention experience analyzed in this valuable new compendium Best practice exists a set of tried and tested ways of slowing the spread of HIV of persuading and enabling people to protect themselves and others from the virus Individually features of best practice can be found almost everywhere The tragedy on a world scale is that prevention is spotty not comprehensive the measures are not being applied on anywhere near the scale needed or with the right focus or synergy The national response may concentrate solely on sex workers for example Elsewhere efforts may go into school education for the young but ignore the risks and vulnerability of men who have sex with men Action may be patchy geographically AIDS prevention may not benefit from adequate commitment from all parts and sectors of society compromising the sustainability of the response In some countries matters are still worse there is still hardly any action at all against AIDS and scarcely any effort to make HIV visible It is no wonder that the epidemic is still emerging and in some

places is altogether out of control Bisexualities and AIDS Peter Aggleton,2020-08-11 Since early on in the epidemic there has been much interest in the role that bisexual behaviour among men may play in HIV transmission This text reviews from an international perspective what has been learned about male bisexuality in countries as diverse as Peru and Britain Its authors examine the forms that bisexuality takes in different cultures what it means to the men concerned and whether or not such behaviour poses special risks The implications of such enquiry for HIV prevention efforts are also examined

Bisexuality: A Critical Reader Merl Storr,2013-04-03 Bisexuality A Critical Reader presents the essential primary texts on bisexuality from the last 100 years in an easy to read format Exploring this often controversial concept from a range of perspectives this book places bisexuality in its historical and cultural context and explores its many meanings and uses Merl Storr s introductions give a straightforward overview of the texts included and sets them clearly in the context of debates on bisexuality This collection includes pieces by Henry Havelock Ellis Sigmund Freud Alfred C Kinsey Wardell B Pomeroy and Clyde E Martin and H l n Cixous *AIDS Sexuality and Gender in Africa* Carolyn Baylies,Janet Bujra,2002-09-11 While there

is a growing list of publications devoted to the AIDS epidemic Africa with two thirds of the world s cases still receives scant attention This book may change the way we think about AIDS and how it is being addressed in Africa and the rest of the world The book draws on first hand research and in depth investigations carried out by a team of researchers from Britain Zambia and Tanzania and focuses on the gendered aspect of the struggle against AIDS The authors study the severity of the epidemic and the threat it poses to the population and society in Tanzania and Zambia They argue that the success of strategies against the spread of AIDS in Africa rests on their recognition of existing gendered power relations and that this success might be enhanced if the strategies are built on existing organisational skills and practices especially among women Their conclusions have repercussions for all countries around the world and especially the rest of Africa **Bisexual**
