Bismarck Edgar Feuchtwanger, 2014-04-03 Bismarck was arguably the most important figure in nineteenth century European history after 1815 In this biography Edgar Feuchtwanger reassesses Bismarck's significance as a historical figure He traces his development from a typical Junker a reactionary and conservative into the so called white revolutionary who recast European affairs more drastically than anyone since Napoleon This second edition includes a new introduction taking into account the most recent scholarship on Bismarck which reflects on Bismarck's legacy in modern Germany which is once again the European economic powerhouse for which Bismarck laid the foundations Feuchtwanger's lucid account demythologizes the German leader without demonising him This book leaves the reader with a strongly etched portrait of one of the decisive makers of the modern world

Acknowledgments Index Reviews of this book David Paull Nickles has plumbed the archives of four countries to determine just how transformative the invention of the telegraph really was Under the Wire is a subtle and impressive examination of history Christian D Brose Wall Street Journal In this study of the impact of telegraphy on the management of international relations the reader is rewarded time and again by finding original observations regarding familiar events This is a book that can have a shaping effect not only on the field of international relations but on many others since it compels one to think hard about how changes in technology affect behavior and thought among groups with deeply rooted traditions and beliefs Ernest R May Harvard University *Threats and Promises* James W. Davis,2000-08 In this work the author works towards a theory of influence in international politics that recognizes the power of promises and assurances as tools of statecraft He offers an analytic treatment drawing on international relations theory deterrence theory and cognitive and social psychology Building on prospect theory from cognitive psychology he develops a testable theory of influence that suggests promises are most effective when potential aggressors are motivated by a desire to avoid loss Davis then considers a series of case studies drawn principally from German diplomatic relations in the later 19th century and early 20th century From the case studies which focus on such issues as European stability colonial competition and the outbreak of World War I Davis shows how a blending of threats and promises according to reasoned principles can lead to a new system of more creative statecraft

Before the Holocaust Hermann Beck,2022-07-28 As the Nazis staged their takeover in 1933 instances of antisemitic violence began to soar While previous historical research assumed that this violence happened much later Hermann Beck counteracts this drawing on sources from twenty German archives and focussing on this early violence and on the reaction of German institutions and the elites who led them Before the Holocaust examines the antisemitic violence experienced in this period from boycotts violent attacks robbery extortion abductions and humiliating pillory marches to grievous bodily harm and murder which has hitherto not been adequately recognized Beck then analyses the reactions of those institutions that still had the capacity to protest against Nazi attacks and legislative measures the Protestant Church the Catholic Church the bureaucracies and Hitler s conservative coalition partner the DNVP and the mindset of the elites who led them to determine their various responses to flagrant antisemitic abuses Individual protests against violent attacks the April boycott and Nazi legislative measures were already hazardous in March and April 1933 but established institutions in the German State and society were still able to voice their concerns and raise objections By doing so they might have stopped or at least postponed a radicalization that eventually led to the pogrom of 1938 Kristallnacht and the Holocaust **German Naval Strategy, 1856-1888** David H. Olivier,2004-08-26 This book is a comparative study of the evolution of the German navy in the second half of the nineteenth century It examines the development of strategy especially commerce raiding in comparison to what other navies were doing in this era of rapid technological change It is not an insular history merely listing ship rosters or

specific events it is a history of the German navy in relation to its potential foes It is also a look at a new military institution involved in an inter service rivalry for funds technology and manpower with the prestigious and well established army
