Pawlowski,2015-08-19 For hundreds of years the Blue Ridge Forest remained silent until just recently It started with something only the insects underground could feel As it grew stronger the birds became aware as they perched in the trees for the night One day someone noticed smoke rising from the old ancient granite peak of the Blue Ridge Mountain Then one early morning hour something was felt but it happened quick with one deep ear splitting sound The sound was deafening Loud enough to be heard all the way to the castle which was three miles away The entity looked at the crack that appeared in front of it For the first time in hundreds of years it has seen light Barely stronger than the light breeze that pushed its way inside the damp cave through the hairline crack The entity slowly made its way out Slithering its way through the eight foot thick crack it stood outside the mountain The entity didn't waste time making its way down the mountain Weakened by being trapped for so many years it needed a host to live in to make it stronger Making its way to the base of the mountain it started seeing animal tracks stopping for a minute to take in all of the scents It knew there were humans close by but it was too weak to take on a human host Finally after a few moments it slithered over a log to track the preferred animal scent Three miles further it came upon its host No more than twenty feet away stood the big deer eating the leaves off the plants that sprouted off the forest floor Even though the deer didn't see hear or smell anything the big buck knew from living its existence in the forest and relying on its senses that some kind of danger lurked nearby The big buck quickly put its head up Standing as still as a statue the buck only moved its eyes to scan the surrounding forest As the moments went by the panic in the deer grew stronger Adrenaline surged through the deer's veins The deer knew it had to run as fast as it could into the safety of the forest But it was too late

Eldridge,J.D. Edman,2012-12-06 This book is designed primarily as a textbook for graduate and postgraduate courses in Medical Public Health and Veterinary Entomology Its uniqueness is that its emphasis is on disease as opposed to arthropods It includes general discussions of epidemiology transmission disease control vector control and disease surveillance In addition it contains chapters oriented towards the many specific arthropod borne diseases Furthermore the book discusses the many direct impacts that parasitic insects have on human and animal health The arthropods themselves are dealt with in two introductory chapters **Elsevier's Dictionary of Plant Names and Their Origin** ,2000-07-19 The dictionary contains about 30 000 vernacular and literary English names of plants plus a few American both wild and cultivated with their botanical name and a brief account of the names meaning if known It was conceived as part of the author s wider interest in plant and tree lore and ethnobotanical studies Knowledge of plant names can give insight into largely forgotten beliefs Why for example is or was the common red poppy known as Blind Man An old

superstition has it that if the poppy were put to the eyes it would cause blindness Such names were probably the result of some taboo against picking the plant Similarly other names were likely to have been applied as a result of a country mother's warning to her children against eating poisonous berries For the warning carries more weight when the name given to the berry reinforces the warning Many such plants or fruits may be ascribed to the devil Devil's Berries for Deadly Nightshade is an example Names may also be purely descriptive and can also serve to explain the meaning of the botanical name Beauty Berry is an example it is the name given to the American shrub that belongs to the genus Callicarpa which is made up of two Greek words that mean beauty and berry Literary or book names have also been included in this dictionary as being a very important part of the whole Many of them provide links in the transmission of words through the ages Thor's Beard for example is a book name for houseleek and has never been used in the dialect But it highlights the legend that houseleek is a lightning plant and by reverse logic is a preserver from fire
