A Bitter Living Sheilagh C. Ogilvie, 2003 Women were key to the changes in the European economy between 1600 and 1800 that led the way to industrialization But we still know little about this female shadow economy and nothing quantitative or systematic This text aims to illuminate women s contribution to the pre industrial economy **A Bitter Living** Sheilagh C. Ogilvie, 2003 What role did women play in the pre industrial European economy Sheilagh Ogilvie tackles this question in an original way using a rich body of new evidence By examining women s contribution to a particular pre industrial economy the German state of Wurttemberg Ogilvie casts doubt on most of the extensive literature about pre industrial women s work She also refutes the new theory of social capital which claims that traditional networks like guilds and communities with their shared norms and collective sanctions benefited everyone She shows how network insiders benefited at the expense of outsiders especially women and harmed the whole economy The result was a bitter living not only for women but for everyone R sum de l diteur *A Bitter Living* Sheilagh C. Ogilvie, 2003 Women were key to the changes in the European economy between 1600 and 1800 that led the way to industrialization But we still know little about this female shadow economy and nothing quantitative or systematic This text aims to illuminate women s contribution to the pre industrial economy

Married Women and the Law in Premodern Northwest Europe Cordelia Beattie, Matthew Frank Stevens, 2013 Fresh approaches to how premodern women were viewed in legal terms demonstrating how this varied from country to country and across the centuries There has been a tendency in scholarship on premodern women and the law to see married women as hidden from view obscured by their husbands in legal records This volume provides a corrective view arguing that the extent to which the legal principle of coverture applied has been over emphasized In particular it points up differences between the English common law position which gave husbands guardianship over their wives and their wives property and the position elsewhere in northwest Europe where wives property became part of a community of property Detailed studies of legal material from medieval and early modern England Wales Scotland Ireland Ghent Sweden Norway and Germany enable a better sense of how when and where the legal principle of coverture was applied and what effect this had on the lives of married women Key threads running through the book are married women s rights regarding the possession of moveable and immovable property marital property at the dissolution of marriage married women s capacity to act as agents of their husbands and households in transacting business and married women s interactions with the courts Cordelia Beattie is Senior Lecturer in Medieval History at the University of Edinburgh Matthew Frank Stevens is Lecturer in Medieval History at Swansea University Contributors Lars Ivar Hansen Shennan Hutton Elizabeth Johnson Gillian Kenny Mia Korpiola Miriam Muller S C Ogilvie Alexandra Shepard Cathryn Spence **Crime, Gender and Social Control in Early Modern Frankfurt am Main** Jeannette Kamp, 2019-12-09 This book charts the lives of suspected thieves illegitimate mothers and vagrants in early modern Frankfurt The book highlights the gender differences in recorded criminality and the

way that they were shaped by the local context Women played a prominent role in recorded crime in this period and could even make up half of all defendants in specific European cities At the same time there were also large regional differences Women s crime patterns in Frankfurt were both similar and different to those of other cities Informal control within the household played a significant role and influenced the prosecution patterns of authorities This impacted men and women differently and created clear distinctions within the system between settled locals and unsettled migrants

Gender and Political Culture in Early Modern Europe, 1400-1800 James Daybell, Svante Norrhem, 2016-07-01 Gender and Political Culture in Early Modern Europe investigates the gendered nature of political culture across early modern Europe by exploring the relationship between gender power and political authority and influence This collection offers a rethinking of what constituted politics and a reconsideration of how men and women operated as part of political culture It demonstrates how underlying structures could enable or constrain political action and how political power and influence could be exercised through social and cultural practices The book is divided into four parts diplomacy gifts and the politics of exchange socio economic structures gendered politics at court and voting and political representations each of which looks at a series of interrelated themes exploring the ways in which political culture is inflected by questions of gender In addition to examples drawn from across Europe including Austria the Dutch Republic the Italian States and Scandinavia the volume also takes a transnational comparative approach crossing national borders while the concluding chapter by Merry Wiesner Hanks offers a global perspective on the field and encourages comparative analysis both chronologically and geographically As the first collection to draw together early modern gender and political culture this book is the perfect starting point for students exploring this fascinating topic

Early Professional Women in Northern Europe, c. 1650-1850 Johanna Ilmakunnas, Marjatta Rahikainen, Kirsi Vainio-Korhonen, 2017-07-06 This book focuses on early examples of women who may be said to have anticipated in one way or another modern professional and or career oriented women The contributors to the book discuss women who may at least in some respect be seen as professionally ambitious unlike the great majority of working women in the past In order to improve their positions or to find better business opportunities the women discussed in this book invested in developing their qualifications and professional skills took economic or other kinds of risks or moved to other countries Socially they range from elite women to women of middle class and lower middle class origin In terms of theory the book brings fresh insights into issues that have been long discussed in the field of women s history and are also debated today However despite its focus on women the book is conceptually not so much focused on gender as it is on profession business career qualifications skills and work By applying such concepts to analyzing women s endeavours the book aims at challenging the conventional ideas about them

Female Servants in Early Modern England Charmian

Mansell,2024-03-19 Excavating experiences of over a thousand women in service from church court testimony Mansell argues that early modern service was unstable but finely graded fluid and contingent Intervening in histories of labour gender freedom and law *Female Servants in Early Modern England* rethinks our understanding of the institution of service

Death and a Maiden William David Myers,2011-04-01 On the feast of St Michael September 1659 a thirteen year old peasant girl left her family s rural home to work as a maid in the nearby city of Braunschweig Just two years later Grethe Schmidt found herself imprisoned and accused of murdering her bastard child even though the fact of her pregnancy was inconclusive and no infant s body was found to justify the severe measures used against her The tale spiraled outward to set a defense lawyer and legal theorist against powerful city magistrates and then upward to a legal contest between that city and its overlord the Duchy of Brunswick with the city s independence and ancient liberties hanging in the balance *Death and a Maiden* tells a fascinating story that begins in the bedchamber of a house in Brunswick and ends at the court of Duke Augustus in the city of Wolfenbettel with political intrigue along the way After thousands of pages of testimony and rancorous legal exchange it is still not clear that any murder happened Myers infuses the story of Grethe s arrest torture trial and sentence for suspected infanticide with a detailed account of the workings of the criminal system in continental Europe including the nature of interrogations the process of torture and the creation of a criminal identity over time He presents an in depth examination of a criminal system in which torture was both legal and an important part of criminal investigations This story serves as a captivating slice of European history as well as a highly informative look at the condition of poor women and the legal system in mid seventeenth century Germany General readers and scholars alike will be riveted by Grethe s ordeal *Women and Gender in Early Modern Europe* Merry E. Wiesner,2008-08-04 The third edition of Merry Wiesner Hanks prize winning book incorporates the newest scholarship and features a new chapter on gender and race in the colonial world expanded coverage of eighteenth century developments including the Enlightenment and enhanced discussions of masculinity single women same sex relations humanism and women s religious roles [The Routledge History of Women in Europe Since 1700](#) Deborah Simonton,2006-04-27 This landmark publication collects the essays of the leading women s historians and provides the most coherent overview of women s role and place in Western Europe from the beginning of the eighteenth century to the twentieth century **Female Agency in the Urban Economy** Deborah Simonton,Anne Montenach,2013-04-17 This innovative new book is overtly and explicitly about female agency in eighteenth century European towns However it positions female activity and decisions unequivocally in an urban world of institutions laws regulations customs and ideologies Gender politics complicated and shaped the day to day experiences of working women Town rules and customs as well as police and guilds regulations affected women s participation in the urban economy most of the time the formally recognized and legally accepted power of women which is an essential component of female agency was very limited Yet these chapters draw attention to how women navigated these gendered terrains As the book demonstrates

exclusion is too strong a word for the realities and pragmatism of women's everyday lives. Frequently guild and corporate regulations were more about situating women and regulating their activities rather than preventing them from operating in the urban economy. Similarly corporate structures which were under stress found flexible strategies to incorporate women who through their own initiative and activities put pressure on the systems. Women could benefit from the contradictions between moral and social unwritten norms and economic regulations and could take advantage of the tolerance or complicity of urban authorities towards illicit practices. Women with a grasp of their rights and privileges could defend themselves and exploit legal systems with its loopholes and contradictions to achieve economic independence and power. *Women's Work and Rights in Early Modern Urban Europe* Anna Bellavitis, 2018-10-09 In the last decades women's role in the workforce has dramatically changed though gender inequality persists and for women gender identity still prevails over work identity. It is important not to forget or diminish the historical role of women in the labour market though and this book proposes a critical overview of the most recent historical research on women's roles in economic urban activities. Covering a wide area of early modern Europe from Portugal to Poland and from Scandinavia to the Mediterranean Bellavitis presents an overview of the economic rights of women property inheritance management of their wealth access to the guilds access to education and assesses the evolution of female work in different urban contexts. *Spinning the Threads of Uneven Development* Jane Gray, 2005-01-01 Using the history of the Irish linen industry as a substantive case study *Spinning the Threads of Uneven Development* shows how gendered variations in the division of labor within and between households affected the economic development of the local and regional textile industry beginning with industrialization through to the transition to industrial capitalism. Drawing on a wide range of sources from census records to folk poetry Jane Gray develops a dynamic model of gender that links the allocation of labor within households to macro socioeconomic change. Expanding on recent literature of the salience of gender in the Irish political economy *Spinning the Threads of Uneven Development* is important reading for social and economic historians as well as those interested in the role of gender in economic development and Irish history.

Porcelain Suzanne L. Marchand, 2022-05-24 This is the book on porcelain we have been waiting for. A remarkable achievement. Edmund de Waal author of *The Hare with Amber Eyes*. A sweeping cultural and economic history of porcelain from the eighteenth century to the present. Porcelain was invented in medieval China but its secret recipe was first reproduced in Europe by an alchemist in the employ of the Saxon king Augustus the Strong.
