The Perils of Protest Teresa Wright, 2001-03-01 China s student movement of 1989 ushered in an era of harsh political repression crushing the hopes of those who desired a more democratic future Communist Party elites sealed the fate of the movement but did ill considered choices by student leaders contribute to its tragic outcome To answer this question Teresa Wright centers on a critical source of information that has been largely overlooked by the dozens of works that have appeared in the past decade on the Democracy Movement the students themselves Drawing on interviews and little known first hand accounts Wright offers the most complete and representative compilation of thoughts and opinions of the leaders of this student action She compares this closely studied movement with one that has received less attention Taiwan s Month of March Movement of 1990 introducing for the first time in English a narrative of Taiwan s largest student demonstration to date Despite their different outcomes the Taiwan action ended peacefully and resulted in the government addressing student demands both movements similarly maintained a strict separation between student and non student participants and were unstable and conflict ridden This comparison allows for a thorough assessment of the origins and impact of student behavior in 1989 and provides intriguing new insights into the growing literature on political protest in non democratic regimes

Concentration Camps Dan Stone, 2019-03-28 Concentration camps are a relatively new invention a recurring feature of twentieth century warfare and one that is important to the modern global consciousness and identity Although the most famous concentration camps are those under the Nazis the use of concentration camps originated several decades before the Third Reich in the Philippines and in the Boer War and they have been used again in numerous locations not least during the genocides in Bosnia and Rwanda Over the course of the twentieth century they have become defining symbols of humankind s lowest point and basest acts In this Very Short Introduction Dan Stone gives a global history of concentration camps and shows that it is not only mad dictators who have set up camps but instead all varieties of states including liberal democracies that have made use of them Setting concentration camps against the longer history of incarceration he explains how the ability of the modern state to control populations led to the creation of this extreme institution Looking at their emergence and spread around the world Stone argues that concentration camps serve the purpose from the point of view of the state in crisis of removing a section of the

population that is perceived to be threatening traitorous or diseased Drawing on contemporary accounts of camps as well as the philosophical literature surrounding them Stone considers the story camps tell us about the nature of the modern world as well as about specific regimes ABOUT THE SERIES The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area These pocket sized books are the perfect way to get ahead in a new subject quickly Our expert authors combine facts analysis perspective new ideas and enthusiasm to make interesting and challenging topics highly readable

Punishment Terance D. Miethe,Hong Lu,2005 This 2005 book examines punishment in different forms including corporal and economic punishment

Transportation Security Against Terrorism M. Tahmisoglu,Ç. Özen,2009-04-29 Even a cursory review of the numerous hijacking train and bus bombings can establish beyond doubt that transport systems are particularly vulnerable targets of terrorist attack This book intends to offer the groundwork for a theoretical and practical understanding of the issues that surround transportation security against terrorism

Surviving Russian Prisons Laura Piacentini,2012-12-06 What do Russian prisons look like Who is sent to prison in Russia How is punishment allocated and administered This pioneering book aims to answer these and other questions by embarking on a journey that begins by exploring how the prisons have survived the collapse of the USSR and ends with a discussion of global penal politics It is the first book to have been written in English on penal practices in the contemporary Russian prison system Surviving Russian Prisons focuses in particular on the reality of work and labour within Russian prisons exploring its

changing function From being for much of the twentieth century a major activity as well as an ideological justification for prison regimes its main function now has been to enable prisoners to survive through participating in a barter economy In exploring the microworlds of the Russian prison this book at the same time presents new evidence and offers fresh insight into how prisons are governed in societies undergoing turbulent social and political transformation it explores how current practices in relation to prisoners work comply with international regulations designed to promote humane containment and positive custody and debates the nature of knowledge on penal discourse in transitional states Handling Societal Complexity Dorien DeTombe, 2015-02-24 This handbook for the Methodology of Societal Complexity describes the theoretical development of the field and lays the foundation for the application of the Compram Methodology in the context of addressing complex societal problems As such it offers a valuable resource for scientists practitioners politicians master and PhD students in the fields of methodology the social sciences operational research management and political science and for all others who are professionally involved in handling complex societal problems These problems are the kind that fill the front page of quality newspapers they have a huge impact on society involve a variety of phenomena and actors and are therefore difficult to handle The structured Compram Methodology provides sound guidelines for handling real life societal problems democratically sustainably and transparently Examples of the use of the Compram Methodology are provided in the domain of global safety with regard to healthcare economics climate change terrorism large city problems large technological projects and floods Complex societal problems must be treated as multi disciplinary multi actor multi level and often as multi continental issues As such they call for a multi disciplinary and multi actor approach that takes into account the emotional aspects of the problem and the problem handling process including the micro meso and macro level which can be accomplished using the methods models and tools from the field of the Methodology of Societal Complexity The Compram Methodology improves the problem handling process and increases the quality of interventions and therefore the quality of life Handling complex societal problems can reduce conflicts save money and ultimately even save lives Dorien J DeTombe is an internationally recognized expert and founder of the Theory of the Methodology of Societal Complexity and the Compram Methodology **Hypocrisy** Vincent Shing Cheng, 2019-10-25 Although the official propaganda surrounding the drug detainees in China is that of helping educating and saving them from their drug habits and the drug dealers who lure them into drug abuse it is clear according to Vincent Shing Cheng that those who have gone through the rehabilitation system lost their trust in the Communist Party's promise of help and consider it a failure Based on first hand information and established ideas in prison research Hypocrisy gives an ethnographic account of reality and experiences of drug detainees in China and provides a glimpse into a population that is very hard to reach and study Cheng argues that there is a discrepancy between the propaganda of helping and saving drug users in detention or rehabilitation centres and the reality of humiliating them and making them prime targets of control Such a discrepancy is possibly threatening rather than enhancing the party state's

legitimacy He concludes the book by demonstrating how the gulf between rhetoric and reality can illuminate many other systems even in much less extreme societies than China This book is highly original meticulously researched and insightful The study comes to very informative conclusions that contrast empirical data with the way drug rehabilitation is displayed in the media and government propaganda It is a must read for scholars in prison studies but should also be recommended to criminologists political scientists and lawyers Saskia Hufnagel Queen Mary University of London The book is an excellent account of the state s handling of drug abuse in China and convincingly argues that the institutions official purpose of helping the offenders is poorly served and largely hypocritical A compelling study based on solid and in depth empirical research James D Seymour Columbia University New Ghosts, Old Ghosts: Prisons and Labor Reform Camps in China

James D. Seymour, Michael R Anderson, 2015-06-01 Much has been written about the laogai sometimes likened to the Soviet gulag in the People s Republic of China Depending on the source the prisons are described as nonexistent enlightened institutions or hellish places that subject the inmates to degradation and misery The system is commonly thought of by admirers and critics alike as having a measurable impact on the national economy and providing significant resources to the state Based on research in classified documents and extensive interviews with former prisoners judicial personnel and other insiders and featuring case studies dealing with the three northwestern provinces this book examines such assertions on the basis of the facts about this underexamined subject in order to arrive at a detailed objective and realistic picture of the situation In the case of each province under study the authors discuss the history of the provincial prison system and the impact that each has had at the macro meso and micro levels Troublemaker Harry Wu, Hongda Harry Wu, 2002 **Deng Xiaoping** Whitney Stewart, 2001-01-01 Traces the life and career of the Chinese Communist leader who brought reforms and international trade to China in the 1980s *China's Great Leap* Minky Worden, 2011-01-04 With contributions from some of the most well respected and experienced Chinese writers journalists and organizers China s Great Leap examines the People s Republic of China as its government and 1.3 billion people prepare for the 2008 Olympic Games When Beijing first sought the Games China was still recovering from the upheavals of Maoist rule and adapting to a market revolution Today China wants to engage with the outside world while fully controlling the engagement How will the new leaders in Beijing manage the Olympic process and the internal and external pressures for reform it creates China s Great Leap will illuminate China s recent history and outline how domestic and international pressures in the context of the Olympics could achieve human rights change Learn about key areas for human rights reform and how the Olympics could represent a possible great leap forward for the people of China and for the world Banished to the Great Northern Wilderness Ning Wang, 2017-02-10 Following Mao Zedong s Anti Rightist Campaign of 1957-58 Chinese intellectuals were subjected to re education by the state In *Banished to the Great Northern Wilderness* Ning Wang draws on labour farm archives interviews and memoirs to provide a remarkable look at the suffering and complex psychological world of banished Beijing intellectuals Wang s use of these

newly uncovered Chinese language sources challenges the concept of the intellectual as renegade martyr showing how exiles often declared allegiance to the state for self preservation While Mao s campaign victimized the banished many of those same people also turned against their comrades Wang describes the ways in which the state sought to remould the intellectuals and he illuminates the strategies the exiles used to deal with camp officials and improve their chances of survival
