**Contours of African American Politics** Georgia A. Persons, 2014-03-31 Contours of African American Politics chronicles the systematic study of African American politics and its subsequent recognition as an established field of scholarly inquiry African American politics emanates from the demands of the prolonged struggle for black liberation and empowerment Hence the study of African American politics has sought to track codify and analyze the struggle that has been mounted and to understand the historic and changing political status of African Americans within American society The notion of a post racial America is one that was birthed by the election of Barack Obama as the first African American president of the United States However another reality is equally compelling that for some time now many African American aspirants for elective office have run against race specific issues putting individual desires to win office above the conventionally defined collective interests of black folk Clearly the Obama presidential election crystallized a complexity of change that had been underway in America prior to his election Indeed did the Obama election signal the end of black politics Does race remain a useful construct for framing the collective interests of African Americans Volume III of Contours of African American Politics examines all of these questions in an effort to understand the more poignant question of the future of that which we have known as black politics

Michael Byrd, Linda A. Clayton, 2012-10-02 At times mirroring and at times shockingly disparate to the rise of traditional white American medicine the history of African American health care is a story of traditional healers root doctors granny midwives underappreciated and overworked African American physicians scrupulous and unscrupulous white doctors and scientists governmental support and neglect epidemics and poverty Virtually every part of this story revolves around race More than 50 years after the publication of *An American Dilemma* Gunnar Myrdal's 1944 classic about race relations in the USA *An American Health Dilemma* presents a comprehensive and groundbreaking history and social analysis of race race relations and the African American medical and public health experience Beginning with the origins of western medicine and science in Egypt Greece

and Rome the authors explore the relationship between race medicine and health care from the precursors of American science and medicine through the days of the slave trade with the harrowing middle passage and equally deadly breaking in period through the Civil War and the gains of reconstruction and the reversals caused by Jim Crow laws It offers an extensive examination of the history of intellectual and scientific racism that evolved to give sanction to the mistreatment medical abuse and neglect of African Americans and other non white people Also included are biographical portraits of black medical pioneers like James McCune Smith the first African American to earn a degree from a European university and anecdotal vignettes like the tragic story of the Hottentot Venus which illustrate larger themes An American Health Dilemma promises to become an irreplaceable and essential look at African American and medical history and will provide an invaluable baseline for future exploration of race and racism in the American health system *Africa Since 1935* Unesco. **Enforcing and Challenging the Voting Rights Act** Marsha Darling, 2014-02-24 Political redistricting is one of the most controversial issues in contemporary American society. The practice of shaping voting districts to enhance the political representation of minorities at all levels of government emerged as a legal remedy for redressing the systematic historical exclusion of minority political representation. It continues to have vocal and active defenders and detractors to this day with court rulings upholding or challenging the practice every year. The controversies of redistricting have challenged America's commitment to participatory democracy and America's ability to account for its historical record of voting and racial discrimination. The legal and historical arguments addressing the policy of redistricting and the constitutional issues surrounding it revolve around interpretations of the Fifteenth Amendment and America's ability to accept or reject race-based solutions to political representation. This three-volume set brings together all the major legal cases and the most influential articles on the legal and historical arguments surrounding this issue.

**Don Troiani's Black Soldiers in America's Wars: 1754-1865** John U. Rees, 2025-01-21 Using a masterful combination of artistry and accuracy, Don Troiani has dedicated his career to transforming our understanding of the military soldier. Don now turns his talents to capturing the under-recognized African American soldiers as they fought in the French and Indian War, the War of Independence, the War of 1812, and the American Civil War. Don's battle paintings, figure studies, and artifact collection are teamed with historian John Rees's insightful text. This long-needed work combines Troiani's magnificent art, the dramatic battle paintings, and authentically illustrated uniformed soldier studies with Rees's introductory chapters on the four wars. Using primary sources, Rees gives a true picture of the contributions of the many Black soldiers over the 100-year history. Together, Troiani and Rees provide the most comprehensive, authoritative, and well-researched study of the Black soldier in early America.

*Encyclopedia of African American Politics* Robert C. Smith, 2003 An A to Z presentation of over 400 articles on African American politics and notable people from the abolitionist movement to Whitney Young.

**American Politics and the African American Quest for Universal Freedom** Hanes Walton, Robert C. Smith, 2015-10-16 This dynamic and comprehensive text from two nationally renowned scholars continues to demonstrate the profound influence African Americans have had and continue to have on American politics. Through the use of two interrelated themes, the idea of universal freedom and the concept of minority-majority coalitions, the text demonstrates how the presence of Africans in the United States affected the founding of the Republic and its political institutions and processes. The authors show that through the quest for their own freedom in the United States, African Americans have universalized and expanded the freedoms of all Americans.

**Gender and the Politics of Welfare Reform** Joanne L. Goodwin, 2007-12-01 The first study to explore the origins of welfare in the context of local politics, this book examines the first public welfare policy created specifically for mother-only families. Chicago initiated the largest mothers' pension program in the United States in 1911. Evolving alongside movements for industrial justice and women's suffrage, the mothers' pension

movement hoped to provide justice for mothers and protection from life's insecurities. However, local politics and public finance derailed the policy and most women were required to earn. Widows were more likely to receive pensions than deserted women and unwed mothers. And African American mothers were routinely excluded because they were proven breadwinners yet did not compete with white men for jobs. Ultimately, the once uniform commitment to protect motherhood faltered on the criteria of individual support and wage earning became a major component of the policy. This revealing study shows how assumptions about women's roles have historically shaped public policy and sheds new light on the ongoing controversy of welfare reform.

*Slavery, Freedom and Conflict* Jane L. Bownas, 2020-03-11. A Story of Two Birminghams examines the roles played by two cities and the areas in which they are situated in the long history of people of African origin and their ancestors who were taken into slavery, experienced a phoney freedom and subsequently experienced racism, segregation and violence. From the eighteenth century, the industrial city of Birmingham in England was involved in the manufacture of guns used in the African slave trade and then later in the production and export of the steam engines used on the sugar plantations in the West Indies. In northern Alabama, on land where another industrial city of the same name would later develop, African slaves worked on cotton plantations owned by planters who would later make their fortunes by selling the mineral-rich land. Abolitionists in Birmingham, UK, and in the Southern States fought against much opposition to achieve freedom for the slaves. But this was often a phoney freedom; for example, under an apprenticeship system in Jamaica, people endured conditions often worse than under slavery, and in Alabama, they endured hard labour in the development of the new industrial city and under the Convict Lease system. *Slavery, Freedom and Conflict* follows the life path of descendants of slaves into the twentieth century, the difficulties experienced by West Indian immigrants in Birmingham, UK, the segregation laws imposed in Birmingham, Alabama, and the US Civil Rights movement which followed. Later in the century, riots occurring in Handsworth, Birmingham, UK, the election of a far-right racist politician in nearby Smethwick, and the infamous speech of Enoch Powell indicated that, as in Birmingham, Alabama, many black people were still suffering from the iniquities of the slave trade inflicted upon their ancestors more than two hundred years previously. This book is essential reading for all those with an interest in the history of slavery and in the local history of the West Midlands of England and the Northern counties of Alabama.
