China Coup Roger Garside, 2021-05-04 An expert's take on how a coup in China could launch a transition to democracy This short book predicts contrary to the prevailing consensus that China's leader Xi Jinping will very soon be removed from office in a coup d'etat mounted by rivals in the top leadership The leaders of the coup will then end China's one party dictatorship and launch a transition to democracy and the rule of law Long time diplomat and development banker author Roger Garside draws on his deep knowledge of Chinese politics and economics first to develop a detailed scenario of how these events may unfold and then in the main body of the book to explain why His gripping persuasive account of how Chinese leaders plot and plan away from the public eye is unique in published literature Garside argues that under Xi's

overconfident leadership China is on a collision course with an America that is newly awakened out of complacency As Xi's rivals look abroad they are alarmed that he is blind to the reactions that China's actions have provoked from the world's strongest power and its allies In domestic affairs Xi's rivals recognize that economic and social change without political reform have created problems that require not just new leaders but a new system of government Security abroad and stability at home demand a revolution to which Xi is implacably opposed To save China and themselves from catastrophe they must remove him and end the dictatorship he is determined to defend But their will and capacity to do so depend crucially on how liberal democracies act Garside's scenario shows America leading its allies in creating the conditions in which Xi's rivals move against him

Factional-Ideological Conflicts in Chinese Politics Olivia Cheung, 2025-10-01 This book reconstructs the factional ideological conflicts surrounding socialist transformation and political reform in China that were played out through factional model making a norm bound mechanism for elites of the Chinese Communist Party to contest the party line publicly Dazhai Anhui Nanjie Shekou Shenzhen Guangdong and Chongqing were cultivated into factional models by party elites before Xi Jinping came to power in 2012 Although factional model making undermined party discipline it often did not threaten regime security and even contributed to regime resilience through strengthening collective leadership and other means This follows that the suppression of factional model making under Xi might undermine longer term regime resilience However Xi believes that regime security rests on his strongman rule not any benefits that factional model making may contribute It is in this spirit that he grooms Zhejiang into a party model for his policy programme of common prosperity which is designed to legitimize his vision of socialism

When Trees Fall, Monkeys Scatter: Rethinking Democracy In China John Keane,2017-08-04 Predictions of the coming collapse of Chinese politics are today commonplace however this thought provoking book explores a radically different alternative China it argues is a one party dominated political system whose surprising levels of public support and resilience in the face of serious economic environmental and social problems suggest that it is more durable than most outside observers suppose China is not an ailing autocracy a case of crony capitalism or a blindly repressive authoritarian regime The rulers of China are in fact experimenting with a wide range of locally made

democratic tools designed to win the trust and loyalty of their subjects Examples probed in this book include the injection of accountability mechanisms into state bureaucracy the toleration of independent public opinion leaders the growing reliance of Party officials and corporate executives on public opinion polls and democratic style and the calculated use by Party officials of digitally networked media as early warning devices Written for students and teachers researchers and general readers fascinated by the rising global power of China When Trees Fall Monkeys Scatter shows why locally made democratic practices often favour one party rule and why China is becoming a globally significant political laboratory a 21st century testing ground for a new type of top down popular government at odds with power sharing democracy as it was known during the past generation *Annual Report* United States.
